QUESTION 1

The requirements traceability matrix should primarily be used to:

- A. identify the risks associated with dependent requirements.
- B. address the responsibility owner for each requirement.
- C. ensure that all requirements have been met.
- D. define a convention to map the requirements to their sources.

Correct Answer: C

QUESTION 2

A business analyst has been assigned to a project to implement a new phone system for a customer call center. The business analyst will need to create a business case. Which of the following components will the business analyst use as input to the business case?

- A. Product scope
- B. Work breakdown structure
- C. Project timeline
- D. Project scope

Correct Answer: D

QUESTION 3

A business analyst for Company A has been assigned to a three-year project to assist health insurance Company B with implementing and testing a new set of medical codes. The business analyst has identified many stakeholders who will participate in the project. For example, Company A will designate technical staff to write and code the requirements and provide a testing team to test the new functionality. The senior director of Company B will require weekly progress updates. The project manager from Company A will create project plans, schedule meetings, and provide meeting minutes.

In the scenario above, what is the role of the technical staff and testing team from Company A?

- A. Consult
- B. Responsible
- C. Accountable
- D. Inform

Correct Answer: C

QUESTION 4

How should a business analyst determine whether a solution satisfies business requirements?

- A. By conducting a brainstorming session with end users
- B. By evaluating the solution against the project charter
- C. By reviewing the results of user acceptance testing
- D. By reviewing the traceability matrix

Correct Answer: B

QUESTION 5

Prior to the design phase, the project team needs to conduct a requirements review with the customer. To prepare for the review, it would be best for the team to:

- A. prepare a test procedure for the product to discuss at the requirements review.
- B. start designing the product to impress the customer with the amount of progress achieved early in the project.
- C. evaluate the requirements and highlight those that cannot be met or need to be deferred.
- D. request a contract amendment to delete any requirements from the contract that will be difficult to meet.

Correct Answer: C
