### QUESTION 1

Which statement best describes the sprint review?

- A. It is a chance for inspecting the outcome of a sprint and determining the next steps
- B. It is a mechanism to control the work of the developers
- C. It is a demo of the work that was done

Correct Answer: AC

The scrum guide says: "The purpose of the Sprint Review is to inspect the outcome of the Sprint and determine future adaptations. "

---

### QUESTION 2

What is a unit test?

- A. A technique for ensuring that units of co-dependent systems integrate correctly
- B. A way to ensure product code satisfies the user requirements
- C. A test that isolates and verifies individual units of functionality
- D. A test that ensures a specific method integrates properly with the code calling it

Correct Answer: C

A unit test is a test that isolates and verifies the functionality of one unit.

---

### QUESTION 3

What is the role of modeling in scrum teams?

- A. Models are not used by agile teams
- B. Models are maintained along with the software as it emerges
- C. Models are assembly instructions for the developers
- D. Modeling may be useful to increase shared understanding

Correct Answer: D

Models are in no way mandatory, however their value as increasing shared language is acknowledged.

---

### QUESTION 4

Who creates documentation included with a working increment?

- A. Scrum requires no documentation
- B. Technical writers
- C. Scrum master
- D. Product owner
- E. Developers

Correct Answer: E

It is part of the increment, so it is part of the work of the developers.

---

#### QUESTION 5

Who is responsible for the system architecture of a product developed using Scrum?

- A. The architect chosen by the developers
- B. The architect chosen by the developers
- C. The assigned architect D. The developers

Correct Answer: D

Scrum doesn't know any other role than developer. The developers are cross-functional and have all the skills needed to create a usable increment. They are doing the work and responsible for the architecture.
