QUESTION 1

What is test first development?

- A. The continuous restructuring of software to retain flexibility
- B. Having the tester in the development team write the test plans before coding
- C. Creating tests before satisfying them
- D. Testing existing code before adding more code to it

Correct Answer: B

Test first development is a different way of saying TDD.

QUESTION 2

Which are four attributes of a good bug report?

- A. Screenshots or pictures of the bug in action, if possible
- B. Explains some new system functionality desired
- C. Includes build or version number where bug was found
- D. Expected results and observed results
- E. Provides simple and repeatable reproduction steps
- F. Includes code for a proposed fix

Correct Answer: ACDE

QUESTION 3

How is architecture decided in a scrum team during a project?

- A. The developers emerge architecture as the system is created
- B. The architect works in the early part of each sprint to define the architecture of that sprint
- C. Upfront designs are presented to the developers prior to the first sprint
- D. The architecture cares for itself as code is written and deployed
- E. An architect on the team undertakes all architecture tasks

Correct Answer: A

Architecture emerges as more is created. There are often guidelines and principles in place.

QUESTION 4

When is performance testing most effectively performed?

- A. In production during peak hours
- B. Often during the development
- C. In production
- D. Just before deployment to production

Correct Answer: B

It's best to do it often during development so that problems can be detected early. Performance testing on production will disturb the production environment.

QUESTION 5

When might a sprint be cancelled?

- A. When the developers feel they aren't ready
- B. When the project manager decides this.
- C. Never, the sprint must always be finished.
- D. When the sprint goal becomes obsolete

Correct Answer: D

The product owner can cancel the sprint if the sprint goal becomes obsolete. This is a very rare event. It can happen when a company losing a client or the client decides to take a completely different turn.
