QUESTION 1

What is Prisma Public Cloud licensing based on?

A. number of alerts generated

B. number of accounts onboarded

C. number of monitored workloads

D. volume of flow logs consumed

Correct Answer: C

QUESTION 2

Which three anomaly policies are predefined in Prisma Public Cloud? (Choose three.)

A. Excessive login failures

B. Unusual user activity

C. Denial-of-service activity

D. Account hijacking attempts

E. Suspicious file activity

Correct Answer: ABD

Account hijacking attempts

--Detect potential account hijacking attempts discovered by identifying unusual login activities. These can happen if there are concurrent login attempts made in short duration from two different geographic locations, which is impossible time travel, or login from a previously unknown browser, operating system, or location.

Excessive login failures

--Detect potential account hijacking attempts discovered by identifying brute force login attempts. Excessive login failure attempts are evaluated dynamically based on the models observed with continuous learning.

Unusual user activity

--Discover insider threat and an account compromise using advanced data science. The Prisma Cloud machine learning algorithm profiles a user\\'s activities on the console, as well as the usage of access keys based on the location and the

type of cloud resources.
