### QUESTION 1

The ability of a Next-Generation Firewall (NGFW) to logically group physical and virtual interfaces and then control traffic based on that grouping is known as what?

- A. LLDP profiles
- B. security zones
- C. DHCP groups
- D. security profile groups

Correct Answer: B

---

### QUESTION 2

In which two of the following scenarios is personal data excluded from protection under the General Data Protection Regulation (GDPR)?

Select 2 Correct Responses

- A. The data was automated as part of an information filing system.
- B. The data was generated in the course of a purely personal or household activity.
- C. The data will be used for the prevention of criminal offenses.
- D. The data is related to a person's economic or cultural identity.

Correct Answer: AC

---

### QUESTION 3

A customer interested in Panorama is concerned about managing multiple firewalls they are putting in place globally. Each location has its own IP addresses, zones, and VPN configurations.

Which element of Panorama will assist the customer in pushing this unique configuration information to the individual firewalls?

- A. device profile
- B. GlobalProtect
- C. templates
- D. device groups

Correct Answer: C

---

#### QUESTION 4

A customer has enabled the Threat Prevention subscription on their Palo Alto Networks Next-Generation Firewall.

How will the performance of the firewall be affected if the customer also enables both WildFire and User-ID?

- A. The maximum throughput performance will be reduced, but the impact will vary based on the firewall model being used.
- B. Enabling User-ID will have no additional performance impact, but enabling WildFire will reduce throughput.
- C. There will be no additional performance impact to the firewall, and throughput will remain the same, regardless of firewall model.
- D. Enabling WildFire will have no additional performance impact, but enabling User-ID will reduce throughput.

Correct Answer: C

---

#### QUESTION 5

Which architecture allows a Palo Alto Networks Next-Generation Firewall (NGFW) to achieve high performance with all security features enabled?

- A. single-pass parallel processing
- B. dual-pass processing
- C. multi-core processing
- D. parallel-pass single processing

Correct Answer: A
