### QUESTION 1

A Public Sector Organization (PSO) is seeking to improve how they manage us community grants and would like to introduce a new portal to allow Organizations to apply for grants. The PSO would also like to improve its internal processes and use the Grants Management package from Public Sector Solutions. The PSO currently uses Salesforce in a minimal capacity, with their staff using the Salesforce Classic UL. In addition to procuring Grants Management licenses, what other three prerequisites should the Technical Consultant advise the PSO are required?

- A. Customer Community Licenses
- B. Enable Chatter
- C. Enable Web-to-Lead
- D. Migrate Users to Lightning Experience
- E. Customer Community Plus Licenses

Correct Answer: ABD

Customer Community Licenses, enabling Chatter, and migrating users to Lightning Experience are three prerequisites that should be advised to the Public Sector Organization (PSO) before using Public Sector Solutions (PSS) components to create a portal for grant applications. Customer Community Licenses are licenses that can be used to create external users who can access data and records in Salesforce, such as grant applicants. Enabling Chatter is a feature that can be used to enable collaboration and communication among users in Salesforce, such as grant reviewers. Migrating users to Lightning Experience is a process that can be used to switch users from Salesforce Classic to Lightning Experience, which is the user interface that supports PSS components.

### QUESTION 2

A large government agency is looking to transform its legacy systems using Salesforce. The agency routinely disperses loans to small and medium businesses using a public portal and the number of users can scale up to more than 100 million in the future. The agency is planning to use Experience Cloud to build this public portal.

Considering the number of users, what license types should they consider using?

- A. Customer Community
- B. Channel Account
- C. Customer Community Plus
- D. Partner Community

Correct Answer: A

Customer Community is a license type that should be considered for building a public portal with Experience Cloud for a large number of users. Customer Community licenses are designed for external users who need access to data and records in Salesforce, such as applying for loans or checking loan status. Customer Community licenses are also cost-effective and scalable for high-volume scenarios, as they are based on logins or monthly page views rather than user counts. Reference:[https://help.salesforce.com/s/articleView?id=sf.networks\\_license\\_types.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.networks_license_types.htm&type=5)

### QUESTION 3

A government-supported agency that helps constituents track the status of their claims is using Public Sector Solutions. For claim assessors to review and process claims, it is crucial to see the applications\ Decision Logs.

Which component can be added to see the history of Decision Explanations for a claim?

- A. Decision Explainer Log History
- B. Log History
- C. Audit Log
- D. Record History

Correct Answer: A

Decision Explainer Log History is a component that can be added to see the history of Decision Explanations for a claim. Decision Explainer Log History displays a list of Decision Explanations that have been generated for a claim by a Decision Matrix or a Business Rules Engine (BRE). It shows the date, time, user, rule name, rule outcome, and explanation text for each Decision Explanation.

### QUESTION 4

A resident in the city of Richdale has concerns about unnecessary debris from construction at a nearby residence and has filed a complaint with the city. The city uses Public Sector Solutions for LPI (Licensing, Permitting and Inspections) to manage residential construction permits.

What three recommendations should a Technical Consultant provide to the city to handle complaints from residents and tie them back to existing residential construction permits?

- A. Link Inspections and Visits to Permit Applications
- B. Configure Inspections and Visits
- C. Link Cases to Permits
- D. Configure Action Plans on Cases and Permits
- E. Set up Business Rules Engine (BRE) to determine Complaint validity.

Correct Answer: ABD

Linking inspections and visits to permit applications allows the city to track the progress and status of the inspections related to the complaints. Configuring inspections and visits enable the city to define the inspection types, schedules,

checklists, and outcomes. Configuring action plans on cases and permits allows the city to automate the inspection tasks and workflows, assign them to inspectors, and collaborate on them using Chatter.

#### QUESTION 5

A government agency runs various research and grant programs for scholars. They have decided to use the Individual Application object in Grants Management for Public Sector Solutions. Which Salesforce features must be enabled to support this use case?

- A. Salesforce Flow
- B. Product Schedule
- C. Person Accounts
- D. Custom Object for Applications

Correct Answer: C

Person Accounts are a Salesforce feature that must be enabled to support the use case of using the Individual Application object in Grants Management for Public Sector Solutions. Person Accounts are a type of account that can store information about individual people, such as scholars, who are not associated with a business account. The Individual Application object is a child object of the Account object and it can be used to track grant applications from individual applicants.
