Correct Answer: B

QUESTION 2

A system administrator installs Qlik Sense Enterprise and is testing the product with a small team of 10 users.

The users report that the page is NOT trusted on their machines and they receive a certificate warning message. When the system administrator tries to validate this feedback on the server, the administrator does NOT see the same issue.

The system administrator completes the following steps in the proxy configuration: Opens all necessary ports Checks in MMC that there is a personal certificate on the server Creates a DNS entry for an easier URL Tries to connect with various Internet browsers on different machines including mobile devices Adds the page to trusted sites in the Internet configurations Installs OpenSSL in the environment

Which steps should the system administrator take to resolve this issue?

A. 1. Generate a valid certificate for organizational needs using OpenSSL

2.

Add the certificate to the personal certificate store of the Qlik Sense Service User

3.

Add the thumbprint of the third-party certificate to the proxy configuration in the QMC

B. 1. Acquire a third-party certificate from a trusted root certificate authority (CA)

2.

Add the certificate to the personal local computer certificate store

3.

Add the thumbprint of the third-party certificate to the proxy configuration in the QMC

C. 1. Acquire a third-party certificate from a trusted root certificate authority (CA)

2.

Add the certificate to the personal certificate store of the Qlik Sense Service User

3.

Add the thumbprint of the third-party certificate to the proxy configuration in the QMC

D. 1. Acquire a third-party certificate from a trusted root certificate authority (CA) including private key

2.

Add the certificate to the personal local computer certificate store

3.

Add the thumbprint of the third-party certificate to the proxy configuration in the QMC

Correct Answer: C

QUESTION 3

A customer uses Qlik Sense Enterprise v3.2 SR5 and wants to upgrade to the latest version. Qlik Sense Enterprise is running on Microsoft Windows Server 2008 R2.

Which option should the system administrator recommend?

A. Run Microsoft Windows Updates to prepare Windows Server 2008 R2 for the latest Qlik Sense version

B. Download the latest patch, Qlik_Sense_update.exe, and install it using Windows compatibility mode

C. Upgrade to Microsoft Windows Server 2012 or later

D. Upgrade only up to the Qlik Sense February 2018 version

Correct Answer: B

QUESTION 4
