QUESTION 1

In developing requirements, a business analyst has decomposed requirements to reflect defined goals, which will deliver some benefit to the customer: the sales manager of Street-Runner Ltd.

The requirements may mostly be achieved in short periods of project effort (2 to 5 weeks), although some rework and change may be required.

What is the format of these requirements?

- A. Business activity models
- B. Process models
- C. Use cases
- D. User stories

Correct Answer: D

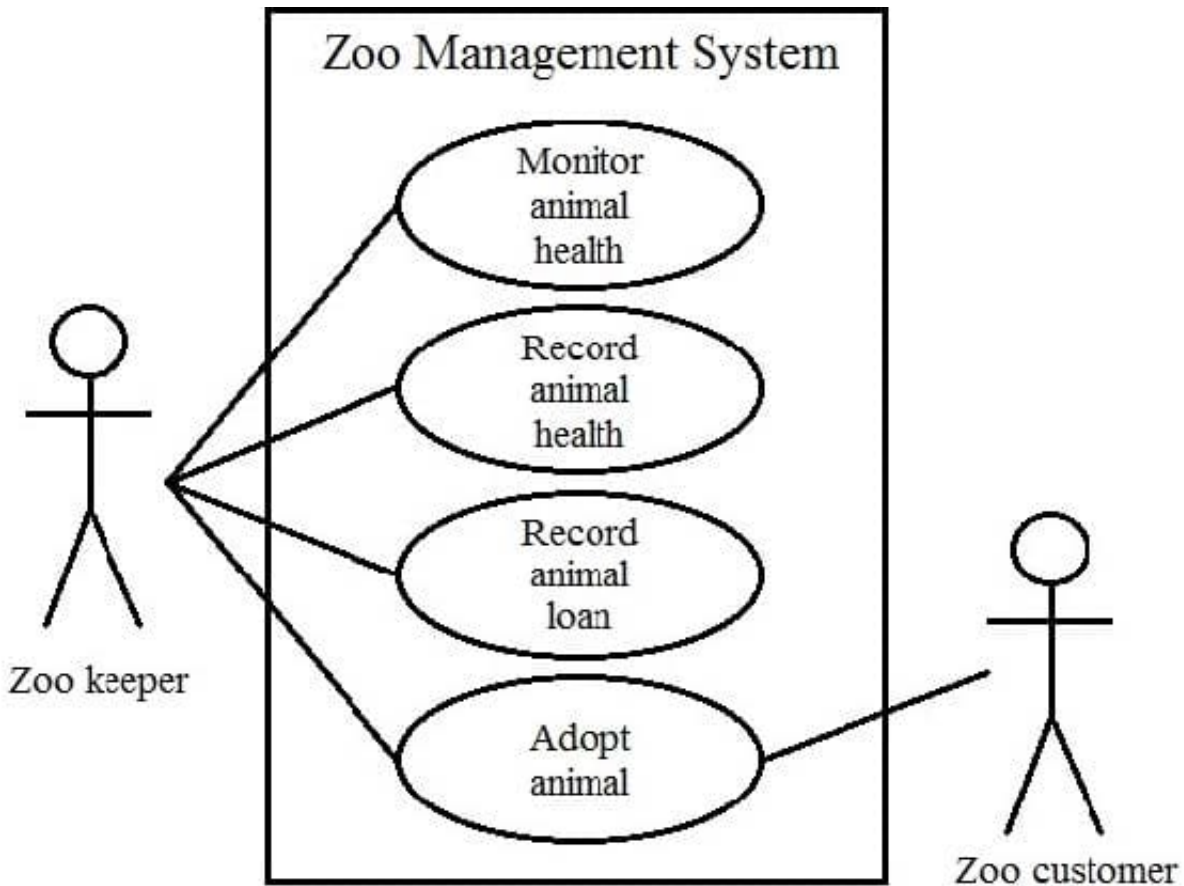

QUESTION 2

A zoo is in the process of introducing a new IT system to improve its processes and drive greater efficiency in its operations. It has received permission from the board of directors for a phased approach to introduce new business functionality and to replace manual processes with digital solutions.

The key areas for inclusion in the first phase are a new animal health monitoring system, which will allow the zookeepers to utilize the power of data analytics to monitor and proactively manage the health of the animals. It will also provide them with a way of accurately recording the birth of new animals and record loans of animals to other zoos around the world.

On the public-facing side, the project will provide customers with an adoption scheme, which will raise much-needed funds.

A business analyst has constructed a use case diagram for the zoo:

The following potential statements have been made about the diagram:

- A) The diagram is a correct representation of the scenario.
- B) There are aspects of the scenario which are incorrectly represented in the diagram.
- C) There are aspects of the scenario which are incorrectly omitted from the diagram.
- D) The notation used in the diagram is incorrect.

Which of them is/are true?

- A. A
- B. B
- C. B and C
- D. C and D

Correct Answer: B

QUESTION 3

A business analyst working on a project has identified:

3 requirements for which there is a workaround and the users can live without;

2 requirements that the users can live without for now;

15 requirements which, if not delivered, will make the solution unworkable or useless.

When these requirements are prioritized using MoSCoW, which of the following categories will not be used?

A. M

B. S

C. C

D. W

Correct Answer: D

QUESTION 4

A project aims to deliver a means of enabling the inhabitants of an archipelago to vote via the Internet. Although the technology exists to provide Internet coverage for the islands, it is notoriously difficult (and therefore expensive) to provide robust coverage because of the remote location.

Two of the requirements captured from stakeholders are provided below:

1.

The solution shall provide all inhabitants with the ability to register and vote for a presidential candidate.

2.

All voters shall receive an email confirmation that their vote has been registered within 2 minutes of voting.

Which requirements filter will be particularly relevant in requirements analysis?

A. Checking for solutions

B. Confirming relevance

C. Feasibility evaluation

D. Removing conflicts

Correct Answer: C

QUESTION 5

A business analyst has been asked to ensure that all requirements are robust.

The following are potential characteristics of a requirement: A) Consistent B) Functional C) Tacit D) Technical E) Owned

F) Relevant

Which of them are characteristics of a requirement that is robust?

A. A, B and D

B. A, E and F

C. B, C and D

D. C, E and F

Correct Answer: C
