### QUESTION 1

Click the Exhibit button.

```
Session => Login to establish  
Application => SCSI  
Protocol Mapping =>  
Transport => TCP  
Network => IP  
Data Link => Ethernet  
Physical = Ethernet Phy)
```

What is the protocol stack shown in the exhibit?

- A. FCoE
- B. SCSI
- C. InfiniBand
- D. Fibre Channel

Correct Answer: B

---

### QUESTION 2

The system administrator has received complaints about the decreased performance of two LUNs. When you investigate the port being used to connect to the LUNs, you discover that the port has achieved its maximum throughput. You also discover that there are other ports available on the storage array that are not oversubscribed.

Which specific driver is needed to balance workloads between the host and storage?

- A. SCSI driver
- B. TCP/IP driver
- C. Failover driver
- D. Multi-path driver

Correct Answer: D

---

### QUESTION 3

A storage networking device has experienced a failure that has "phone home" and opened a service request for a part that can be a customer replaceable unit (CRU). Your support vendor has dispatched a replacement part using a secure courier service.

According to SNIA Storage Security Best Current Practices, which statement is correct about the repair process?

- A. The support vendor's parts courier should have access to the secure data center to facilitate an unattended part swap-out bringing the fastest resolution to the failure.
- B. The data center operations staff should accept the part and place it in a secure staging area awaiting a qualified administrator to perform the installation.
- C. Any data center operator on-site should perform the part installation bringing the fastest resolution to the failure.
- D. The support vendors parts courier should coordinate with a field service staff person from your support vendor; both should have access to the secure data center to facilitate an unattended part swap-out.

Correct Answer: B

---

#### QUESTION 4

You have been asked to secure your FC switches in the data center. Unsecure protocols have already been disabled but you also need to restrict access to the switches only from specific IP addresses located on the production network.

What should be used?

- A. Roles
- B. VSAN
- C. ACL
- D. Zone

Correct Answer: C

---

#### QUESTION 5

A storage subsystems Web browser management interface reports that the subsystem has become degraded and remotely opens a service request with the vendor. Your vendors level three storage support engineer wants to remotely access your storage subsystem for troubleshooting.

What is a SNIA Storage Security Best Current Practices solution?

- A. Open firewall ports to allow the vendor's support engineer to access the Web browser management interface.
- B. Provide the vendor's support engineer with a temporary user ID that has sudo access to become a super user on the storage subsystem; this ensures an audit trail for all remote support activities.
- C. Provide the vendor's support engineer with a shared remote control session where you can monitor what the support engineer is doing while troubleshooting the subsystem without needing to share credentials.
- D. Provide a temporary user ID to allow the vendor's support engineer to access the Web browser management interface remotely over HTTP/TLS.

Correct Answer: C

---
