QUESTION 1

Which of the following statements makes sense? Select the correct answer.

- A. I have 3 REST services, 2 of which do not support the PUT method.
- B. I have 3 REST services, 2 of which have a PUT operation in the SOAP header schemas of their WSDL definitions.
- C. I have 3 REST services, 2 of which do not support HTTP.
- D. None of these statements make sense.

Correct Answer: A

QUESTION 2

The amount of services participating in a service activity, the duration of the service activity, the amount of service activity instances that concurrently exist, and rules associated with the service activity are all examples of: Select the correct answer.

- A. design-time data that is defined via the WSDL data definition language
- B. runtime data that is expressed as part of a WSDL service operation definition
- C. state or context data that can be managed using WS-Coordination
- D. repository resource data that can be managed using WS-Policy via persistence in a database for longterm storage

Correct Answer: C

QUESTION 3

XSLT is a technology that is primarily used to address _____. Select the correct answer.

- A. technology protocol bridging requirements (such as when .NET and Java components need to speak to each other)
- B. data model transformation requirements (such as when similar data based on different XML schemas needs to be exchanged)
- C. layer transformation requirements (such as when data located in different architectural layers needs to be exchanged between architectural layers)
- D. service transformation requirements (such as when two versions of the same service exist)

Correct Answer: B

QUESTION 4

Which of the following statements is false? Select the correct answer.

- A. The WS-I is an industry standards organization that provides basic profiles to help foster interoperability among solutions based on XML and Web services industry standards.
- B. OASIS is an industry standards organization that has developed a number of important technology specifications, including WS-BPEL and UDDI.
- C. The W3C is a standards organization that has developed a number of important technology specifications, including SOAP, WSDL, and WS-Addressing.
- D. The OAS-C is an industry standards organization that has developed a number of important technology specifications, including WS-Security and XML Schema.

Correct Answer: D

QUESTION 5

A _____ establishes a common access point generally based on HTTP methods used by _____. Select the correct answer.

- A. WSDL definition, SOAP-based Web service
- B. uniform contract, REST services
- C. XML schemas, components
- D. None of the above

Correct Answer: B
