QUESTION 1

Which of the following service-orientation principles support the application of the Service Composability principle?
SELECT ALL THAT APPLY

- A. Standardized Service Contract
- B. Service Autonomy
- C. Service Integration
- D. Service Statelessness

Correct Answer: ABD

QUESTION 2

The Service Abstraction principle emphasizes the need to reveal as much of the underlying details of a service as possible in order to support the Service Discoverability principle in its goal of maximizing the quantity of published information about a service. Select the correct answer.

- A. True
- B. False

Correct Answer: B

QUESTION 3

Which of the following statements correctly explains the difference between the Service Reusability and Service Composability principles? Select the correct answer.

- A. Service Reusability is focused on creating generic, reusable service logic, whereas Service Composability is focused on creating services that are effective participants of multiple service compositions.
- B. Service Reusability is focused on creating non-agnostic service logic, whereas Service Composability is focused on creating agnostic service logic.
- C. Service Reusability is focused on creating highly scalable services, whereas Service Composability is focused on creating highly isolated services.
- D. There is no difference between these two principles. One principle name is used instead of the other depending on whether you are building a task or entity service.

Correct Answer: A

QUESTION 4

Which of the following statements is true? SELECT ALL THAT APPLY

- A. The Service Composability principle is closely associated with the Service Reusability principle because service composition can be seen as a form of reuse.
- B. The Service Composability principle is highly revolutionary because the concept of aggregating software programs is new to distributed computing.
- C. The Service Composability principle emphasizes that services need to be designed to participate as effective members of multiple service compositions.
- D. The Service Composability principle prepares services for immediate and eventual participation in compositions.

Correct Answer: ACD

QUESTION 5

Which of the following is a common challenge imposed by the adoption of service- orientation? Select the correct answer.

- A. Service-orientation introduces the need for design standards, which need to be followed and enforced.
- B. Service-orientation requires that you commit to one vendor platform, which can limit your product options.
- C. Service-orientation requires that services be protected from repeated reuse, which can reduce potential ROI.
- D. Service-orientation introduces the need to make all implementation details about each service publicly available, which can lead to the misuse of this information by some project teams.

Correct Answer: A
