QUESTION 1

Which of the following are goals of the Service Reusability design principle? Select the correct answer.

- A. To support the creation of services based upon agnostic service logic.
- B. To allow for service logic to be repeatedly leveraged over time so as to achieve an increasingly high return on the initial investment of delivering the service.
- C. To increase organizational agility by enabling wide-scale service composition from service inventories that contains a high percentage of reusable services.
- D. All of the above.

Correct Answer: D

QUESTION 2

Besides the Standardized Service Contract principle, which of the following service- orientation principles are also primarily focused on the design of the service contract? SELECT ALL THAT APPLY

- A. Service Autonomy
- B. Service Statelessness
- C. Service Discoverability
- D. Service Abstraction

Correct Answer: CD

QUESTION 3

Which of the following statements is true? Select the correct answer.

- A. A composition initiator must exist as a service.
- B. A composition initiator can be any type of program capable of invoking a service and therefore does not need to be service-oriented.
- C. A composition initiator is often associated with the intermediary role.
- D. None of the above statements are true.

Correct Answer: B

QUESTION 4

Project Team A delivered 3 services and a month later Project Team B delivered 5 services. After an audit of the

services delivered by these two project teams, it was determined that 3 of the services delivered by Project Team B contained redundant logic that already resides in 2 of the services originally delivered by Project Team A. The audit results are negative because it is considered undesirable to have redundant logic among services. Which service-orientation principle could have been applied to help avoid this result? Select the correct answer.

- A. Service Statelessness
- B. Service Reusability
- C. Standardized Service Contract
- D. Service Abstraction

Correct Answer: B

QUESTION 5

The _____ principle is primarily concerned with ensuring that services exercise a high level of control over their underlying runtime execution environment. Select the correct answer.

- A. Service Performance
- B. Service Autonomy
- C. Service Agility
- D. Service Abstraction

Correct Answer: B
