QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 tenant.

You have 100 IT administrators who are organized into 10 departments.

You create the access review shown in the exhibit. (Click the Exhibit tab.)

Create an access review

Access reviews allow reviewers to attest to whether users still need to be in a role.

You discover that all access review requests are received by Megan Bowen.

You need to ensure that the manager of each department receives the access reviews of their respective department.

Solution: You add each manager as a fallback reviewer.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 4

You have an Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

Name	Role
Admin1	Cloud application administrator
Admin2	Application administrator
Admin3	Security administrator
User1	None

You add an enterprise application named App1 to Azure AD and set User1 as the owner of App1. App1 requires admin consent to access Azure AD before the app can be used. You configure the Admin consent requests settings as shown in the following exhibit.

Admin consent requests

Users can request admin consent to apps they are unable to consent to ⓘ Yes No

Who can review admin consent requests ⓘ

Reviewer type	Reviewers
Users	4 users selected.
Groups (Preview)	+ Add groups
Roles (Preview)	+ Add roles

Selected users will receive email notifications for requests ⓘ Yes No

Selected users will receive request expiration reminders ⓘ Yes No

Consent request expires after (days) ⓘ 30

Admin1, Admin2, Admin3, and User

Correct Answer: D

QUESTION 5

HOTSPOT

You need to meet the technical requirements for license management by the helpdesk administrators.

What should you create first, and which tool should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Object to create for each branch office:

	▼
An administrative unit	
A custom role	
A Dynamic User security group	
An OU	

Tool to use:

	▼
Azure Active Directory admin center	
Active Directory Administrative Center	
Active Directory module for Windows PowerShell	
Microsoft 365 admin center	

Correct Answer:

Answer Area

Object to create for each branch office:

	▼
An administrative unit
