How to implement

Microsoft recommends that your organization enable self-service password reset to allow users who have either forgotten their password or whose account has been locked out as a result of malicious attempts, using an alternate factor to reset their password without the assistance of the help desk.

How to Use Microsoft Solutions to Implement

Your organization can use Azure Active Directory (Azure AD) to give users the ability to change or reset their password with no administrator or help desk involvement. Select **Launch Now** to enable Self-Service Password Reset (SSPR) by selecting "All" or "Selected" on the "Properties" page to determine applicable users.

QUESTION 2

Your company manufactures parts that are each assigned a unique 12-character alphanumeric serial number. Emails between the company and its customers reference the serial number.

You need to ensure that only Microsoft Exchange Online emails containing the serial numbers are retained for five years.

Which three objects should you create? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a sensitivity label
- B. a retention policy
- C. an auto-labeling policy
- D. a trainable classifier

- E. a sensitive info type
- F. a retention label
- G. a data loss prevention (DLP) policy

Correct Answer: CEF

C: One of the most powerful features of retention labels is the ability to apply them automatically to content that matches specified conditions.

F: You can apply retention labels to content automatically when that content contains: Specific types of sensitive information Specific keywords or searchable properties that match a query you create A match for trainable classifiers

E: Sensitive information types are pattern-based classifiers. They detect sensitive information like social security, credit card, or bank account numbers to identify sensitive items. Custom sensitive information types use regular expressions, keywords, and keyword dictionaries.

QUESTION 3

You have a Microsoft 365 E5 subscription.

You need to identify personal data stored in the subscription and control the transfer of personal data between users and groups.

Which type of license should you acquire?

- A. Microsoft Purview Audit (Premium)
- B. Priva Privacy Risk Management
- C. Microsoft 365 E5 Compliance
- D. Priva Subject Rights Requests

Correct Answer: B

QUESTION 4

You are creating an advanced data loss prevention (DLP) rule in a DLP policy named Policy 1 that will have all locations selected. Which two conditions can you use in the rule? Each correct answer presents a complete solution. (Choose two.)

NOTE: Each correct selection is worth one point.

- A. Content contains
- B. Content is shared from Microsoft 365

- C. Document size equals or is greater than
- D. Attachment's file extension is
- E. Document property is

Correct Answer: AB

QUESTION 5

HOTSPOT

You have the files shown in the following table.

Name	Location	Date modified	Date created
File1	Microsoft SharePoint Online site	June 01, 2018	December 28, 2011
File2	Microsoft OneDrive account	February 02, 2017	January 02, 2011
File3	Microsoft Exchange Online public folder	May 01, 2006	May 01, 2006

You configure a retention policy as shown in the exhibit.

RetentionPolicy 1

Status
