QUESTION 1

What should you use to ensure that the members of an Azure Active Directory group use multi-factor authentication (MFA) when they sign in?

- A. Azure Active Directory (Azure AD) Identity Protection
- B. a conditional access policy
- C. Azure role-based access control (Azure RBAC)
- D. Azure Active Directory (Azure AD) Privileged Identity Management (PIM)

Correct Answer: B

The recommended way to enable and use Azure AD Multi-Factor Authentication is with Conditional Access policies. Conditional Access lets you create and define policies that react to sign-in events and that request additional actions before a user is granted access to an application or service.

QUESTION 2

What can you use to provide threat detection for Azure SQL Managed Instance?

- A. Microsoft Secure Score
- B. application security groups
- C. Microsoft Defender for Cloud
- D. Azure Bastion

Correct Answer: C

QUESTION 3

Which three authentication methods can be used by Azure Multi-Factor Authentication (MFA)? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. text message (SMS)
- B. Microsoft Authenticator app
- C. email verification
- D. phone call
- E. security question

Correct Answer: ABD

QUESTION 4

HOTSPOT

Select the answer that correctly completes the sentence.

Hot Area:

Answer Area

	▼
Microsoft Defender for Cloud Apps	
Microsoft Defender for Endpoint	
Microsoft Defender for Identity	
Microsoft Defender for Office 365	

is a cloud-based solution that leverages on-premises Active Directory signals to identify, detect, and investigate advanced threats.

Correct Answer:

Answer Area

	▼
Microsoft Defender for Cloud Apps	
Microsoft Defender for Endpoint	
Microsoft Defender for Identity	
Microsoft Defender for Office 365	

is a cloud-based solution that leverages on-premises Active Directory signals to identify, detect, and investigate advanced threats.

Reference: <https://docs.microsoft.com/en-us/defender-for-identity/what-is>

QUESTION 5

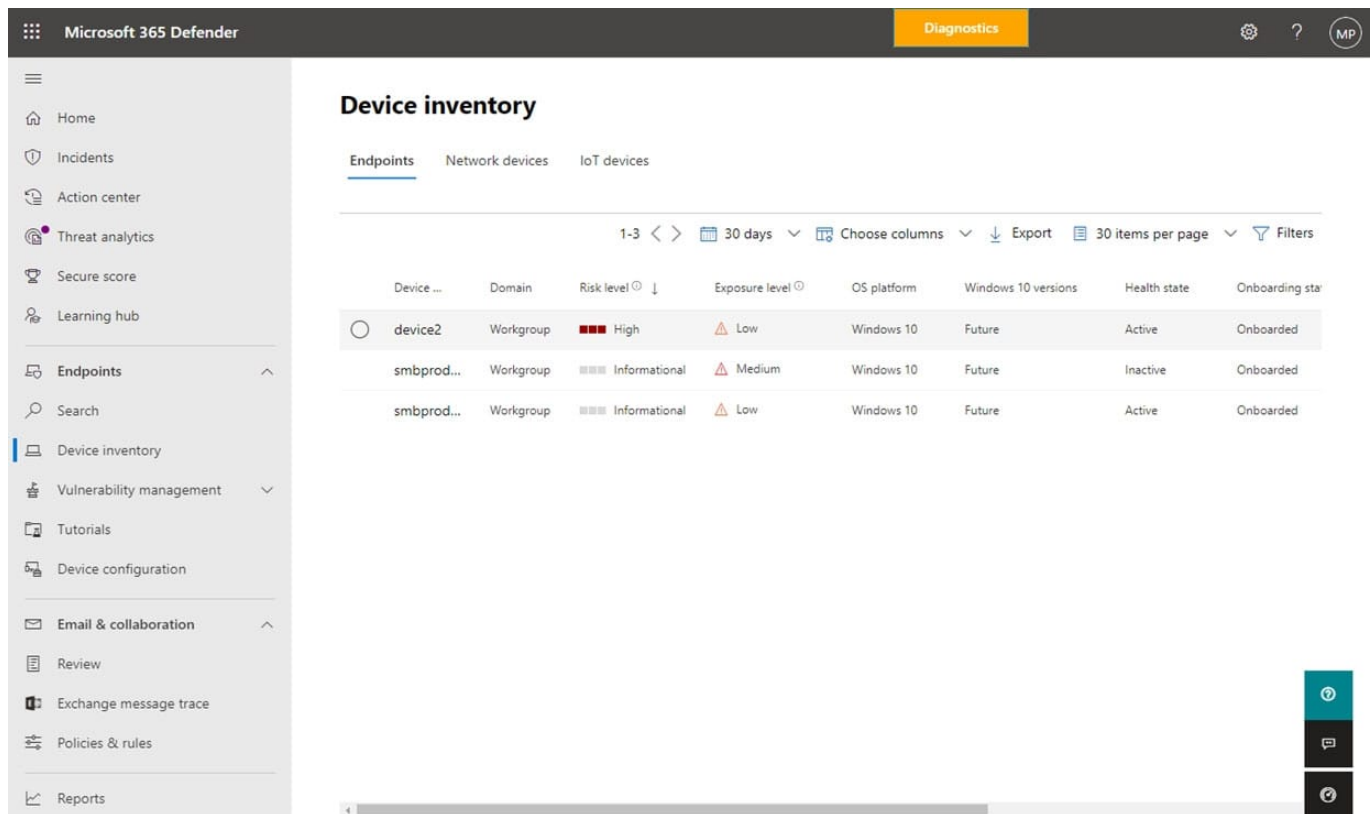

Which two cards are available in the Microsoft 365 Defender portal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Devices at risk
- B. Compliance Score
- C. Service Health
- D. User Management
- E. Users at risk

Correct Answer: AE

A: The Devices at risk card includes a View details button. Selecting that button takes us to the Device inventory page, as shown in the following image

E: The Microsoft 365 Defender portal cards fall into these categories:

Identities- Monitor the identities in your organization and keep track of suspicious or risky behaviors. Here you can find the Users at risk card.

Data - Help track user activity that could lead to unauthorized data disclosure.

Devices - Get up-to-date information on alerts, breach activity, and other threats on your devices.

Apps - Gain insight into how cloud apps are being used in your organization.

Incorrect:

Not C: The Service Health card can be reached from the Microsoft 365 admin center.
