**QUESTION 2**

HOTSPOT

Select the answer that correctly completes the sentence.

Hot Area:

### Answer Area

<input type="text"/>
Archiving
Compressing
Deduplicating
Encrypting

a file makes the data in the file readable and usable to viewers that have the appropriate key.

Correct Answer:

### Answer Area

<input type="text"/>
Archiving
Compressing
Deduplicating
Encrypting

a file makes the data in the file readable and usable to viewers that have the appropriate key.

### QUESTION 3

What can you use to provide a user with a two-hour window to complete an administrative task in Azure?

- A. Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
- B. Azure Multi-Factor Authentication (MFA)
- C. Azure Active Directory (Azure AD) Identity Protection
- D. conditional access policies

Correct Answer: A

Privileged Identity Management provides time-based and approval-based role activation to mitigate the risks of excessive, unnecessary, or misused access permissions on resources that you care about. Here are some of the key features of Privileged Identity Management: Provide just-in-time privileged access to Azure AD and Azure resources Assign time-bound access to resources using start and end dates Require approval to activate privileged roles Enforce multi-factor authentication to activate any role Use justification to understand why users activate Get notifications when

privileged roles are activated Conduct access reviews to ensure users still need roles Download audit history for internal or external audit Prevents removal of the last active Global Administrator role assignment.

**QUESTION 4**

**HOTSPOT**

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

Statements	Yes	No
Azure Active Directory (Azure AD) Identity Protection generates risk detections once a user is authenticated.	<input type="checkbox"/>	<input type="checkbox"/>
Azure Active Directory (Azure AD) Identity Protection assigns a risk level of Low, Medium, or High to each risk event.	<input type="checkbox"/>	<input type="checkbox"/>
A user risk in Azure Active Directory (Azure AD) Identity Protection represents the probability that a given identity or account is compromised.	<input type="checkbox"/>	<input type="checkbox"/>

Correct Answer:

**Answer Area**

Statements	Yes	No
Azure Active Directory (Azure AD) Identity Protection generates risk detections once a user is authenticated.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Azure Active Directory (Azure AD) Identity Protection assigns a risk level of Low, Medium, or High to each risk event.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
A user risk in Azure Active Directory (Azure AD) Identity Protection represents the probability that a given identity or account is compromised.	<input checked="" type="checkbox"/>	<input type="checkbox"/>

**QUESTION 5**

Which Microsoft portal provides information about how Microsoft cloud services comply with regulatory standard, such as International Organization for Standardization (ISO)?

- A. the Microsoft Endpoint Manager admin center
- B. Azure Cost Management + Billing
- C. Microsoft Service Trust Portal
- D. the Azure Active Directory admin center

Correct Answer: C

The Microsoft Service Trust Portal contains details about Microsoft's implementation of controls and processes that protect our cloud services and the customer data therein.

Reference: <https://docs.microsoft.com/en-us/microsoft-365/compliance/get-started-with-service-trust-portal?view=o365-worldwide>
