### QUESTION 1

At Universal Containers, users should only see Accounts they or their subordinates own. All Accounts with the custom field "Key Customer" should be visible to all Senior Account Managers. There is a custom field on the Account record that contains sensitive information and should be hidden from all users, except 3 designated users who require view and edit access. These three users come from different user groups, and will change occasionally. Which three platform security features are required to support these requirements with the minimum amount of effort? Choose 3 answers

- A. Criteria-Based Sharing Rules
- B. Owner-Based Sharing Rules
- C. Role Hierarchy
- D. Apex Managed Sharing
- E. Permission Sets

Correct Answer: ACE

---

### QUESTION 2

Universal Containers would like to restrict users' access to export reports

What option supports this requirement?

- A. Remove the "Report Manager" user permission.
- B. Remove the Export button from the report page layout.
- C. Remove "Allow Export" on the report folder settings.
- D. Remove the "Export Reports" profile permission.

Correct Answer: D

---

### QUESTION 3

To grant Universal Containers sales manager access to shipment records properly, it was necessary to leverage Apex managed sharing. The IT team is worried about improper access to records. Which two features and best practices should a Salesforce architect recommend to mitigate this risk?

- A. Use runAs system method in test classes to test using different users and profiles.
- B. Use with Sharing keyword in Apex classes to assure record visibility will be followed.
- C. Use isShareable in Apex classes to assure record visibility will be followed.
- D. Use isAccessible keyword in Apex classes to assure record visibility will be followed

Correct Answer: AB

---

#### QUESTION 4

When writing test methods, what functionality is verified by the system method "runAs()?"

- A. Enforcement of a user's record sharing.
- B. Enforcement of user permissions.
- C. Enforcement of a user's field-level security.
- D. Enforcement of user's public group assignments.

Correct Answer: A

---

#### QUESTION 5

Universal Containers is designing a new community using the Customer Community license type. They would like to have the users complete survey questions through the community interface and store the responses in a Custom Object that has a lookup to the account object. Any internal user who has access to the account should be able to see all survey responses. All Customer Community users should be able to see surveys filled in by other users for their company, but not surveys for other companies. What are the correct security settings to achieve this?

- A. Set all Organization-Wide Default settings to be "Public Read/Write" for both internal and external users.
- B. Set all Organization-Wide Default security to be "Private" for both internal and external users and use Sharing Rules to grant the desired access
- C. Set all Organization-Wide Default security to be "Public Read/Write" for internal users and "Private" for external users.
- D. Set the custom object to be master-detail to the Account and leave the Organization-Wide Default settings as their default values.

Correct Answer: B
