QUESTION 1

Universal Containers is creating a custom Visualforce page to allow users to edit contact records. The developer has used an apex:outputField for the Phone field on the contact object. What is the expected behavior if a user without field-level security accesses the Visualforce page?

- A. The user encounters an error while saving the record.
- B. The output field is visible to the user.
- C. The user is able to enter a value into the Phone field.
- D. The field is automatically removed from the page.

Correct Answer: D

QUESTION 2

Universal Containers\\' organization wide-defaults model is private for the Account object. A sales rep wants to view opportunity records.

Which level of access will the sales rep have to the related account record?

- A. No access
- B. Read/Create/Edit access
- C. Read/Create access
- D. Read-only access

Correct Answer: B

QUESTION 3

Universal Containers has implemented a strict software architecture for their custom Apex code. One of the requirements is that all SOQL queries are contained within reusable classes. Depending on the context of the Apex transaction, the queries should be able to run either "With Sharing" or "Without Sharing". Which two ways allow the Architect to meet these requirements? Choose 2 answers.

- A. Create a reusable SOQLQueries class; do not specify "With" or "Without Sharing" on the SOQLQueries class.
- B. Create a reusable SOQLQueries class; do not specify "With" or "Without Sharing" on the SOQLQueries class and use the runAs() method to dynamically set the context.
- C. Create a reusable SOQLQueries class; specify "With Sharing" on the methods that require user context and "Without Sharing" on the methods requiring system context.
- D. Create a SystemSOQLQueries class and a UserSOQLQueries class; set the "With Sharing" keyword on the UserSOQLQueries class and "Without Sharing" on the SystemSOQLQueries class.

Correct Answer: CD

QUESTION 4

Universal Containers is updating its Organization-Wide Sharing Settings for the Account Object from a "Public Read/Write" model to a "Private" model, so that they can hide certain national accounts from sales reps and sales managers. These national accounts should only be accessible by sales directors and above. Universal Container\'s Role Hierarchy matches its organizational hierarchy.

Which two options should the Architect consider when designing the solution?

Choose 2 answers

- A. Sales directors will need a sharing rule created so that they can see accounts owned by Sales Users.
- B. National accounts must be owned by a user who is above the sales managers in the Role Hierarchy.
- C. Apex managed sharing will have to be disabled for the account object to protect the national accounts.
- D. If a sales rep is added to the Opportunity Team for a national account, they will gain access to account data.

Correct Answer: BD

QUESTION 5

Universal Containers has built a recruiting application on the salesforce Platform. HR requested that all internal users should have edit access to the referral custom object. One of the recruiters needed to share a referral record with another colleague for collaboration using manual sharing. The recruiter opened the referral record and could not find the share button. What could be the technical reason for this?

- A. The Referral object OWD is private.
- B. The Referral object OWD is public Read/Write.
- C. The Referral object OWD is public Read only.
- D. The Referral object OWD is public Full Access.

Correct Answer: B
