QUESTION 1

In a non-SXA multisite implementation, what is the recommended practice for storing reusable content that is shared between the different sites?

- A. You should create a folder on each site and use cloning for this type of content.
- B. It is not a recommended practice to share content between sites.
- C. You should store this type of content outside of any one site's content tree structure.
- D. Location does not matter because content can be retrieved from anywhere.

Correct Answer: C

QUESTION 2

A company you develop for wants to temporarily change the design for their main page for a company anniversary celebration. Because this will be a specific version of the main page that is published for a specific period, which Sitecore feature enables you to accomplish this change while easily allowing you to revert to the original design?

- A. Final layouts
- B. Shared layouts
- C. Restricted layouts
- D. Versioned layouts

Correct Answer: D

QUESTION 3

Which statement characterizes the Sitecore Extranet security domain?

- A. It provides default access to the Sitecore identity server for users to log in to the appropriate environment areas.
- B. It is an internal security domain for users that can access the Sitecore client tools and editing functionality.
- C. It is the domain that contains user accounts as well as customized roles for managing read access to the website content.
- D. It provides customized roles for controlling access to third-party environments such as a CRM or payment portal.

Correct Answer: C

QUESTION 4

Which of the following is considered a complex field and should not be rendered using the `Html.Sitecore().Field()`

method when developing with Sitecore MVC?

- A. Number
- B. Image
- C. Check box
- D. Single-line text

Correct Answer: C

QUESTION 5

You are designing a component that will allow users to select a content item from a specific place within the content tree as the data source. How will you ensure the component is flexible and the user can select a content item upon use?

- A. Ensure the insert options for the component are enabled so the Author can change the content item for the component.
- B. Ensure the users can create a new component from Experience Editor and configure the Datasource Template field.
- C. Ensure the component supports a change to the data source and configure the Datasource Location field.
- D. Ensure you add a placeholder within the component so the Experience Editor prompts the user for a content item.

Correct Answer: C
