### QUESTION 1

A cybersecurity manager has scheduled biannual meetings with the IT team and department leaders to discuss how they would respond to hypothetical cyberattacks. During these meetings, the manager presents a scenario and injects additional information throughout the session to replicate what might occur in a dynamic cybersecurity event involving the company, its facilities, its data, and its staff. Which of the following describes what the manager is doing?

- A. Developing an incident response plan
- B. Building a disaster recovery plan
- C. Conducting a tabletop exercise
- D. Running a simulation exercise

Correct Answer: C

This is a tabletop exercise as they are talking about all hypothetical events that could happen and what to do if it were to happen. A simulation on the other hand would be recreating a specific event to practice what to do in that scenario.

---

### QUESTION 2

Which of the following refers to applications and systems that are used within an organization without consent or approval?

- A. Shadow IT
- B. OSINT
- C. Dark web
- D. Insider threats

Correct Answer: A

---

### QUESTION 3

The database administration team is requesting guidance for a secure solution that will ensure confidentiality of cardholder data at rest only in certain fields in the database schema. The requirement is to substitute a sensitive data field with a non-sensitive field that is rendered useless if a data breach occurs

Which of the following is the BEST solution to meet the requirement?

- A. Tokenization
- B. Masking
- C. Full disk encryption

D. Mirroring

Correct Answer: A

Tokenization is mainly used to protect data at rest whereas masking is used to protect data in use.

---

#### QUESTION 4

A company wants to pragmatically grant access to users who have the same job. Which of the following access controls should the company most likely use?

- A. Role-based
- B. Need-to-know
- C. Mandatory
- D. Discretionary

Correct Answer: A

---

#### QUESTION 5

An engineer wants to access sensitive data from a corporate-owned mobile device. Personal data is not allowed on the device. Which of the following MDM configurations must be considered when the engineer travels for business?

- A. Screen locks
- B. Application management
- C. Geofencing
- D. Containerization

Correct Answer: A

"access sensitive data from a corporate-owned mobile device" screen locks is MORE important than geofencing in this case..
