You want to minimize the whitespace between the sheets.

What should you configure?

- A. The background
- B. The position
- C. The padding
- D. The size
- E. The border

Correct Answer: C

Explanation: To minimize the whitespace between the sheets, you should configure the padding of the sheets and the dashboard. Padding is the amount of space between the edge of a sheet or dashboard and its content. You can adjust the padding by using the Layout tab in the Format pane. You can reduce the padding for each sheet by selecting the sheet and changing the values for the inner and outer padding. You can also reduce the padding for the dashboard by selecting the dashboard and changing the values for the outer padding. Reducing the padding will make the sheets and the dashboard more compact and eliminate unnecessary whitespace. References: Format Dashboards - Tableau Tableau Certified Data Analyst Study Guide
