QUESTION 1

Which two conditions could be used for VXLAN transport? (Choose two.)

- A. Multicast on physical network
- B. Proxy ARP must be enabled on the first hop router.
- C. Unicast with a NSX controller cluster
- D. Auto-RP must be configured on the first hop router.

Correct Answer: AC

QUESTION 2

An administrator determines that when a host residing in a High Availability (HA) cluster fails, the virtual machines fail to restart on a remaining host, or will only restart after a long delay.

Which two conditions would account for this behavior? (Choose two.)

- A. The virtual machines were not protected by vSphere HA at the time the failure occurred.
- B. Distributed Resource Scheduler was not enabled at the time the failure occurred.
- C. There is insufficient spare capacity on hosts with which the virtual machines are compatible.
- D. The virtual machines contain physical Raw Device Mappings.

Correct Answer: AC

QUESTION 3

A vCloud Automation Center administrator has created and published a blueprint. Attempting to test a request of the blueprint does not show the catalog item associated with the blueprint.

What additional configuration is required to test the blueprint?

- A. Log in as a member of the Business Group with entitlements to the Service associated with the Blueprint.
- B. Log in to another Tenant that has access to the blueprint.
- C. Add a new reservation to the Business Group that is entitled to the service associated with the blueprint.
- D. Log out and log back in so the Blueprint becomes visible.

Correct Answer: A

QUESTION 4

Which three actions should an administrator take before creating a vCloud Automation Center Business Group? (Choose three.)

- A. Identify the Active Directory distribution groups for the users.
- B. Determine which users will be assigned the Business Group Manager role.
- C. Identify the Active Directory security groups for the users.
- D. Determine which Cost Profiles will be used for the users.
- E. Identify the Distinguished Name of Containers where the Users and Groups for the Tenant are located.

Correct Answer: BCE

QUESTION 5

A vCloud Automation Center administrator configures a virtual machine blueprint with a maximum storage capacity of 50 GB. The virtual machine attached to that blueprint is provisioned with 15 GB of storage.

What happens when the virtual machine is deployed using the default settings?

- A. The virtual machine is deployed with 15 GB of storage.
- B. The virtual machine is not deployed.
- C. The virtual machine disk is deployed with 50 GB of storage.
- D. The user is prompted to reconfigure the virtual machine's storage.

Correct Answer: A
