#### QUESTION 1

Which command is used to determine the state of an AdvancedDisk storage server?

- A. nbdevconfig
- B. nbdevquery
- C. nbemmcmd
- D. nbstserv

Correct Answer: B

---

#### QUESTION 2

A storage unit group is configured that has disk and then tape listed. During a backup session, jobs start retrying and then running on the tape device only.

What is a likely cause of the change?

- A. The disk storage unit is full.
- B. The tape device was listed first in the storage unit group.
- C. The tape device was listed second in the storage unit group.
- D. The disk storage unit is staging to tape.

Correct Answer: B

---

#### QUESTION 3

An administrator wants to review the throughput of backup clients to improve performance.

Which area of the NetBackup Administration Console displays the throughput of backups for all clients?

- A. Status of Backups
- B. Device Monitor
- C. All Log Entries
- D. Client Backups

Correct Answer: C

---

#### QUESTION 4

Which two actions should an administrator take to allow NetBackup to manage the allocation of volumes to volume pools? (Select two.)

- A. define a scratch pool and add all of the volumes to it so NetBackup will move volumes to the other pools as volumes are needed
- B. assign volumes to all volume pools as required in the environment
- C. define a scratch pool with assigned volumes so NetBackup will move the assigned volumes to other pools as volumes are needed
- D. create volume pools as required, but refrain from adding volumes to the pools
- E. assign volumes to NetBackup and DataStore volume pools so NetBackup will move the assigned volumes to other pools as volumes are needed

Correct Answer: AD

---

#### QUESTION 5

After creating a NBU-Catalog backup policy, an administrator receives the following message:

DR file is on the same partition as your catalog and will be unusable in an actual disaster or disk failure.

Which two options are available to an administrator to ensure the DR file is available for future use? (Select two.)

- A. ensure the folder DR file is on a non-root volume
- B. ensure the DR file is created on a volume other than the NetBackup volume
- C. specify a user that has credentials to the volume that contains NetBackup binaries
- D. configure a valid email address of the administrator in the Send email option
- E. specify the NBU-Catalog backup policy as a critical policy

Correct Answer: BD
