QUESTION 1

An administrator notices that backups are failing for clients added to a new backup policy. The backups attempt to run again after 10 minutes.

How can the administrator modify the time between backup attempts?

- A. modify the Job retry delay host property
- B. modify the Policy update interval host property
- C. modify the Schedule backup attempts host property
- D. modify the Take checkpoints every value in the backup policy

Correct Answer: C

QUESTION 2

Backups are failing with status code 96 because tapes have NOT returned to the scratch volume pool after all the images on the tapes have expired.

What may be preventing the media from returning to the scratch pool?

- A. The media was created in volume pools other than the scratch pool.
- B. The media is in an off-site location.
- C. The media was written with multiplexed images.
- D. The media is in a Suspended state.

Correct Answer: A

QUESTION 3

An administrator is preparing to perform disaster recovery for many clients whose backups are stored on multiplexed tapes.

Which host property should the administrator modify, prior to the restores, to ensure the best recovery time?

- A. set Enable unrestricted media sharing for all media servers
- B. increase Restore retries
- C. increase Delay on multiplexed restores
- D. add the client IP addresses to Resilient Networks

Correct Answer: A

QUESTION 4

An administrator has a backup for client Linux1 using the LinuxClients policy complete successfully. Even though the policy Backup Selections are NOT modified, the backup job fails the next day with the following status code:

Error 71: none of the files in the file list exist.

What is a possible reason the job failed?

- A. The Enable granular recovery option was unset.
- B. The client was added to another backup policy.
- C. The file systems have been unmounted on the client.
- D. The client was temporarily shut down.

Correct Answer: C

QUESTION 5

Which two performance scenarios benefit from seeding the MSDP pool? (Select two.)

- A. new client backups over WAN
- B. new application backups over SAN
- C. new VADP VMWare backups using media server as the backup host
- D. new replication to a new DR site
- E. new clients with large file systems containing small files

Correct Answer: AD
