QUESTION 1

An administrator has a backup for client Linux1 using the LinuxClients policy complete successfully, even though the policy Backup Selections are NOT modified, the backup job fails the next day with the following status code:

```
Error 71: none of the files in the file list exist.
```

What is a possible reason the job failed?

- A. The Enable granular recovery option was unset.
- B. The client was added to another backup policy.
- C. The file systems have been unmounted on the client.
- D. The client was temporarily shut down.

Correct Answer: C

QUESTION 2

A Netbackup environment suffers from intermittent network outages between the Media Server Drduplication Pool (MSOP) media server and clients during the backup window.

This results in multiple backup failures.

How should an administrator overcome the backup failure issue?

- A. enable Network Resiliency
- B. configure client-side deduplication
- C. increase the client connect timeout
- D. increase the CR_STATS_TIMLR interval

Correct Answer: A

QUESTION 3

Refer to the exhibit.

Two media servers, sharing a library with 10 tape drives, exist in the NetBackup 8.0 environment displayed in the exhibit. Both weekly full and daily differential incremental backups need to run for the clients and each schedule has a different retention period. Because of network topology, some clients back up to Media Server 1 and some back up to Media Server 2. The environment suffers from multiple status 96 failures during the backup window.

How can the administrator minimize the number of failures?

- A. increase the Media unmount delay
- B. configure media multiplexing
- C. enable backups to span tape media
- D. enable media sharing

Correct Answer: D

QUESTION 4

Which command is used to determine the state of an AdvancedDisk storage server?

- A. nbdevconfig
- B. nbdevquery
- C. nbemmcmd

D. nbstserv

Correct Answer: B

QUESTION 5

An administrator needs to duplicate a backup that completed successfully earlier that same day. How can this be accomplished?

- A. locate the original backup from NetBackup Management > Reports > Images on Media, right click and select duplicate
- B. locate the policy for the original backup and initiate a manual backup
- C. locate the original backup in the activity monitor, right click and select restart
- D. locate the original backup from NetBackup Management > Catalog, right click and select duplicate

Correct Answer: D
