QUESTION 1

What are two advantages of enabling the '\\Use storage-based catalogs\\' option? (Select two.)

- A. Faster cataloging is available
- B. Detailed cataloging is available
- C. New catalogs are created by reading each file block
- D. On-media catalogs are copied to the Backup Exec server
- E. The size of catalogs is reduced

Correct Answer: AD

QUESTION 2

An administrator is attempting to browse file and directory details, but only backup set header information is available.

What may be the cause for the lack of detailed information; and how should the administrator enable the selection of individual items for restore?

- A. The backup sets have expired, and the media must be re-cataloged.
- B. The backup sets have expired, and the media must be re-inventoried.
- C. The Backup Exec server catalog settings have been set to truncate automatically, and the media must be re-cataloged
- D. The Backup Exec server catalog settings have been set to truncate automatically, and the media must be re-inventoried.

Correct Answer: D

QUESTION 3

An administrator installs a new Robotic Library, but is unable to see the library in the Backup Exec console.

Which two steps should the administrator perform to ensure the Robotic Library can be used in Backup Exec? (Select two.)

- A. verify the library is working properly in the Windows Device Manager
- B. enable the Tape Drive Support option in Backup Exec
- C. confirm the library is listed in the Hardware Compatibility List
- D. enable debugging, then look for the library again
- E. install the Library Expansion Option license

Correct Answer: BD

QUESTION 4

An administrator needs to ensure that any new resources added to a server in the future will be automatically included in the backup job.

How should the administrator make the selections to ensure dynamic protection?

- A. Check the box next to the server name
- B. Check the job option for dynamic inclusion
- C. Use the Advanced File Selection page to dynamically include all resources on the server
- D. Enable the option to Discover Data to Back Up in Backup Exec Settings

Correct Answer: A

QUESTION 5

What are two requirements for configuring Optimized Duplication between two or more Backup Exec servers? (Select two.)

- A. The Central Admin Server (CAS) and Managed Backup Exec Server (MBES) must be configured.
- B. The NDMP option must be installed.
- C. The OS must be similar on the Backup Exec servers where the Deduplication Folder needs to be shared.
- D. The same Deduplication account must be used on all the Backup Exec servers.
- E. The Deduplication storage on each Backup Exec server must be shared.

Correct Answer: AE
