QUESTION 1

Which jobs are unavailable to an administrator using the Backup Exec Management Command Line Interface (BEMCLI)?

- A. synthetic backup jobs
- B. Enterprise Vault Discovery Accelerator backup jobs
- C. Linux server backup jobs
- D. Instant Recovery jobs

Correct Answer: B

QUESTION 2

What are two requirements for enabling the Backup Exec Management Command Line Interface (BEMCLI)? (Select two.)

- A. Microsoft ReportViewer
- B. Microsoft Visual C++ Redistributable
- C. Microsoft Silverlight
- D. Microsoft .NET 3.5
- E. Microsoft Windows PowerShell V2

Correct Answer: BC

QUESTION 3

An administrator needs to use Symantec Backup Exec 2014 to protect a VMware environment. The data store containing the VMware virtual machines is located on SAN disk storage. The Symantec Backup Exec 2014 server is also connected to the SAN infrastructure. The administrator needs to restrict the flow of backup data such that it always travels over the SAN.

How should the administrator proceed?

- A. enable forced SAN mode on the VMware vCenter server
- B. select the NBD transport option in backup properties
- C. use the transport mode priority list option to only select SAN transport mode
- D. enter the IP Address of the SAN data storage server

Correct Answer: C

QUESTION 4

Which two types of information are stored in the Backup Exec Database? (Select two.)

- A. installation logs
- B. device and media information
- C. catalogs
- D. encryption keys
- E. debug logs

Correct Answer: BD

QUESTION 5

An administrator needs to ensure that any new resources added to a server in the future will be automatically included in the backup job.

How should the administrator make the selections to ensure dynamic protection?

- A. Check the box next to the server name
- B. Check the job option for dynamic inclusion
- C. Use the Advanced File Selection page to dynamically include all resources on the server
- D. Enable the option to Discover Data to Back Up in Backup Exec Settings

Correct Answer: A
