QUESTION 1

The Enterprise Vault server is running out of disk space in a particular index location and the administrator wants to move some indexes to a new location.

How should the administrator move the indexes?

- A. manually move the Index files to the new location > run the "Synchronize" task
- B. use the "Index Volumes Browser" and choose the index volume > click the "Move" button C. run the "Change Location" task > manually copy the Index files to the new location
- D. manually move the Index files to the new location > change the path in the IndexServiceEntry table in the EV directory database

Correct Answer: C

QUESTION 2

Which task is responsible for the shortcut processing after an Archive Move to a different Veritas Enterprise Vault 12.3 site?

- A. provisioning task on the source Enterprise Vault server
- B. provisioning task on the destination Enterprise Vault server
- C. archiving task on the destination Enterprise Vault server
- D. archiving task on the source Enterprise Vault server

Correct Answer: C

QUESTION 3

Users are being prompted for a username and password when trying to access archived items.

Which setting can the administrator change to prevent the prompt?

- A. Desktop Policy > Web Applications tab > Add all Enterprise Vault servers to intranet zone and Bypass local proxy server
- B. Desktop Policy > Advanced tab > Outlook > modify the Add server to Intranet Zone option to include all Exchange CAS servers
- C. Mailbox Policy > Advanced tab > Archiving General > change the Inherited Permissions setting to On
- D. Mailbox Policy > Advanced tab > Archiving General > change the Include default and anonymous permissions setting to On

Correct Answer: A

QUESTION 4

In which two instances should an administrator run the Manage Indexes Rebuild tool? (Select two.)

- A. to rebuild index volumes after they have been upgraded to 64-bit
- B. to rebuild index volumes that the Change Location tool has moved
- C. to rebuild index volumes after their Indexing Level has been changed
- D. to rebuild index volumes to clear the Failed status
- E. to rebuild index volumes that the Synchronize tool has failed to fix

Correct Answer: CE

QUESTION 5

A backup administrator is recovering from a system crash. The Veritas Enterprise Vault 12.3 for Exchange (EV) SQL databases and Vault Store partitions have been recovered.

Which two additional components are required to restore the EV server? (Select two.)

- A. Indexes
- B. MSMQ
- C. Application binaries
- D. Temp directory
- E. Vault Cache location

Correct Answer: AC
