### QUESTION 1

An administrator runs a server backup to the Tape Library and has two backups created for the same server. The first backup contains the drive backup [C, D], and the second backup has the system state selected. When a virtual conversion of the server is attempted, the Convert to virtual option is greyed out.

What could be the reason for the Convert to virtual option being greyed out?

- A. Catalogs operation needs to be performed on the backup sets.
- B. The Convert to virtual option is unsupported on tape backups.
- C. Simplified Disaster Recovery (SDR) is disabled.
- D. The VMware and Hyper-V Agent needs to be installed.

Correct Answer: C

---

### QUESTION 2

An administrator needs to use Backup Exec to protect a VMware environment. The datastore containing the VMware virtual machines is located on SAN disk storage. The Backup Exec server is also connected to the SAN infrastructure. The administrator needs to ensure the backup data only travels over the SAN.

How should the administrator proceed?

- A. enable forced SAN mode on the VMware vCenter server
- B. select the NBD transport option in backup properties
- C. use the transport mode priority list option to only select SAN transport mode
- D. enter the IP Address of the SAN data storage server

Correct Answer: D

---

### QUESTION 3

Which two types of information are held in the Backup Exec server catalogs? (Choose two.)

- A. the resource credentials
- B. the resource
- C. the primary copy
- D. the backup time stamp
- E. the device credentials

Correct Answer: BD

---

#### QUESTION 4

When the Deduplication feature is installed on a Backup Exec server, four services are installed.

Which two services are also available on a remote computer that has the Agent for Windows installed, even if the Deduplication feature is unavailable on the Backup Exec server?

- A. Backup Exec Deduplication Engine and Backup Exec Deduplication Manager
- B. Backup Exec Deduplication Manager and Backup Exec Deduplication Multi-threaded Streaming Agent
- C. Backup Exec Deduplication Engine and Backup Exec PureDisk Filesystem Service
- D. Backup Exec PureDisk Filesystem Service and Backup Exec Deduplication Multi-threaded Streaming Agent

Correct Answer: A

---

#### QUESTION 5

What is required in order to perform a Simplified Disaster Recovery (SDR) of a system from a deduplicated backup set?

- A. The deduplicated data must be staged to the local server before recovery.
- B. The deduplication storage folder must be locally attached to the target server.
- C. The deduplication storage folder must be taken offline to prevent backups from running during the restore operation.
- D. The target server must connect to a Backup Exec Server with the deduplication storage.

Correct Answer: D
