### QUESTION 2

An administrator has several expired backup sets that are still showing under the configured Disk Storage.

Which two reasons will prevent the expired backup sets from being deleted? (Choose two.)

- A. There are other unexpired backup sets that are dependent on them.
- B. The expired backup sets need to be duplicated before they will be deleted.
- C. The expired backup sets are part of a (Simplified Disaster Recovery) SDR-enabled backup.
- D. The expired backup sets have to be overwritten by a new backup job.
- E. The expired backup sets need to be manually deleted from the Backup Exec console.

Correct Answer: AC

---

### QUESTION 3

An administrator targets a backup to a disk storage device, but the backup goes into a queued state due to insufficient disk space.

Which action should the administrator take to ensure the next backup completes successfully?

- A. split the backup into more than one backup job
- B. include only as much data as can fit on the disk storage device
- C. target the backup to a disk storage pool that has more than one device in the pool with sufficient space
- D. recreate the backup job

Correct Answer: C

---

#### QUESTION 4

In which scenario should an administrator choose to use the faster processing method for Hyper-V backups?

- A. The administrator wants to use full and incremental backup methods.
- B. The administrator wants to use full and differential backup methods.
- C. The administrator wants to use client-side deduplication for backups.
- D. The Hyper-V host has limited space for checkpoints.

Correct Answer: A

---

#### QUESTION 5

Which two conditions cause Data Discovery to fail to detect remote servers in the same domain as the Backup Exec server? (Choose two.)

- A. The administrator failed to add the default logon account to the local administrators group on the remote servers.
- B. The servers have Windows Management Instrumentation (WMI) disabled.
- C. The firewall on the remote servers is configured to block WMI traffic.
- D. The firewall on the remote servers is configured to block port 10000.
- E. The remote servers have an old version of the Backup Exec Agent for Windows installed.

Correct Answer: BC
