QUESTION 2

Which is the main advantage of using SAN snapshots for backups?

- A. Speeds up the backup process.
- B. Decreases the amount of time the VM is running on a VMware snapshot.
- C. Helps you avoid creating a VMware snapshot.
- D. Saves space in the repository.

Correct Answer: B

QUESTION 3

What is the name of the process Veeam creates for each remote console session?

- A. Satellite
- B. Transport
- C. Gateway
- D. Data Mover

Correct Answer: D

QUESTION 4

Is it possible to switch between backup methods when creating regular backup files?

- A. Yes, the new method will transform all existing backups in the appropriate way and continue creating backups in the same backup repository.
- B. Yes, in this case you will have to specify a new backup repository.
- C. Yes, the new method leaves existing backups as they are and continues creating backups in the same backup repository.
- D. No, if you want to create backups using another method, you have to create another backup job.

Correct Answer: C
