QUESTION 1

Which backup mode uses the file extension .vib for incremental backup files?

- A. Veeam Backup and Replication does not create files with the .vib extension
- B. Veeam Backup and Replication always creates .vib files to store increments and rollbacks
- C. Forever forward incremental backup
- D. Reverse incremental backup

Correct Answer: C

Reference: https://helpcenter.veeam.com/docs/backup/hyperv/forward_incremental_backup.html?ver=

QUESTION 2

When configuring an On-Demand Sandbox, when should the Backup Administrator indicate that the Application Group should keep running once the job completes?

- A. When running a SureBackup job
- B. When configuring a SureBackup job
- C. When configuring a Virtual Lab
- D. When creating an Application Group

Correct Answer: A

QUESTION 3

After selecting Incremental mode in the job settings, which setting is required to ensure Forever Forward Incremental Backup Mode is configured?

- A. Disable synthetic full backups and active full backups
- B. Enable the "Transform previous backup chains into rollbacks" box
- C. Enable synthetic full backups and/or active full backups
- D. Enable the "Use Forever Forward Incremental" box

Correct Answer: A

Reference https://helpcenter.veeam.com/docs/backup/vsphere/incremental_forever_backup.html?ver =95

QUESTION 4

If the Backup Administrator has to perform a backup over a high-latency, low bandwidth network link, the disruptions to the backup process can be avoided by:

- A. Adjusting the compression and deduplication settings for this job
- B. Making a direct backup using WAN Accelerators
- C. Making a backup locally and utilizing WAN Accelerators for the backup copy job

Correct Answer: A

QUESTION 5

Which requirements must be met in order to perform transaction log backups for a database on a Microsoft SQL Server with Veeam Backup and Replication? (Choose the 2 appropriate options)

- A. The recovery model for the database must be set to Simple.
- B. The recovery model for the database must be set to Full or Bulk-Logged.
- C. No other backup tool truncates the SQL server's log files.
- D. The database must have its log files on a separate VMDK.

Correct Answer: BC
