QUESTION 3

in which scenario would an SSL VPN solution have an advantage over an IPSec VPN?

- A. when users are unable to install software on their PC
- B. when users require a secure connection to the corporate network
- C. when users work remotely
- D. when users require the ability to RDP to internal resources

Correct Answer: C

QUESTION 4

Which four of these statements regarding object size and WebAccelerator performance are true? (Choose four.)

- A. Large objects such as video cache well
- B. Large objects allow fewer requests per second
- C. Large objects result in higher throughput
- D. Small objects result in higher throughput
- E. Small objects such as images cache well
- F. Small objects allow more requests per second

Correct Answer: BCEF

QUESTION 5

By default, BIG-IP ASM allows which of the following HTTP methods in a client request? (Choose three.)

- A. PUT
- B. GET
- C. POST
- D. HEAD
- E. TRACE

Correct Answer: BCD

QUESTION 6

Why is BIG-IP ASM ideally suited to protect against layer 7 attacks, including HTTP and HTTPS/SSL traffic, when compared to an intrusion prevention system (IPS)?

- A. An intrusion prevention system (IPS) is based on Packet Filtering.
- B. An IPS doesn't have the visibility into HTTPS traffic. it doesn't understand what applications are in the network.
- C. An IPS only focus on operating system attacks; it doesn't understand what application are in the network.
- D. An IPS can only look at overall traffic patterns; it doesn't understand what applications are in the network.

Correct Answer: D

QUESTION 7

A VoIP application requires that data payloads will NOT be fragmented. Which protocol controls network behavior in this situation?

- A. RTSP
- B. UDP
- C. TCP
- D. IP

Correct Answer: A

QUESTION 8

What are the two primary functions of the OSI 7-layer model? (Choose two)

- A. to group communications into logical layers
- B. to define host-to-host communications
- C. to standardize HTTP communications between different vendors
- D. to go interoperability between products made by different vendors
- E. to define protocol behavior

Correct Answer: AE

QUESTION 9

When configuring monitors for individual pool members, which three options can be selected?

(Choose three.)

- A. inherit the pool's monitor
- B. choose a default monitor
- C. inherit the Wide-IP's monitor
- D. assign a monitor to the specific pool member
- E. do not assign any monitor to the specific pool member

Correct Answer: ADE

QUESTION 10

Identifying users by their IP address is a sufficient method of performing authentication and authorization.

- A. True
- B. False

Correct Answer: B

QUESTION 11

An F5 customer must install WebAccelerator on top of LTM:

- A. True
- B. False

Correct Answer: B

QUESTION 12

A client is transmitting a large amount of data to a server During this process, the server sets the window size to zero

What is the likely cause of this issue?

- A. The server is unable to accept more data
- B. The server resets the connection
- C. The client runs out of network buffers
- D. The server reaches its maximum segment size

Correct Answer: A

<https://wiki.wireshark.org/TCP%20ZeroWindow>

QUESTION 13

When initially configuring the BIG-IP system using the config utility, which two parameters can be set. (Choose two.)

- A. the netmask of the SCCP
- B. the IP address of the SCCP
- C. the port lockdown settings for the SCCP
- D. the netmask of the host via the management port
- E. the IP address of the host via the management port
- F. the port lockdown settings for the host via the management port

Correct Answer: DE

QUESTION 14

The ARX is like a mini network manager. It is able to check the health of the environment and can raise alerts when thresholds are reached.

- A. True
- B. False

Correct Answer: A

QUESTION 15

What is the advantage of specifying three load balancing methods when load balancing within pools?

- A. Specifying three methods allows the GTM System to use all three methods simultaneously.
- B. Specifying three methods allows the GTM System to choose the optimal method for each name resolution.
- C. Specifying three methods allows the GTM System alternate methods if insufficient data is available for other methods.
- D. Specifying three methods allows the GTM System to rotate between the three methods so that no one method is used too often.

Correct Answer: C
