QUESTION 1

To ensure the maximum cross-browser compatibility and consistent functionality, Web developers should:

- A. Test their pages in the most used release of each major Web browser.
- B. Test their pages in the most common browsers, including the most used and latest releases.
- C. Test their pages in only standards-compliant browsers, including the most used and latest releases.
- D. Test their pages in the Web browser most commonly used by the site audience, including the most used and latest release.

Correct Answer: B

QUESTION 2

Web developers typically include comments in their code for which reason?

- A. To insert server-side programs, such as JavaScript
- B. To communicate performance issues to site visitors
- C. To explain the purpose of code sections to other developers
- D. To declare which version of HTML each part of the code is using

Correct Answer: C

QUESTION 3

Katie developed her corporation's intra net site using proprietary HTML language extensions based on the company's current browser. The company has recently updated its systems to include the use of a new browser. Now the intra net site that Katie developed no longer renders its content consistently. What should Katie do to ensure that this site's content renders consistently regardless of the browser used?

- A. Revise the site to include workarounds and hacks for the new browser.
- B. Revise the site's markup language in only those areas that are not rendering properly.
- C. Update the site using a single language standard consistently, such as HTML5 or XHTML.
- D. Update the site using the proprietary language extensions required by the new browser's rendering engine.

Correct Answer: C

QUESTION 4

Since the advent of HTML5, which choice accurately describes a difference between a mobile app and a mobile Web

site?

- A. A mobile Web site is faster because it uses the mobile phone's default browser.
- B. A mobile app is faster because it does not necessarily use the browser.
- C. A mobile Web site cannot create an immersive experience for users.
- D. A mobile app can be used on any operating system.

Correct Answer: B

QUESTION 5

Clyde is working on a Web page for his company's intranet. He wants to insert an HTML comment within the page to let other developers know that the page validates as HTML5 and that he is the page author. Which line of code will insert the comment that Clyde requires?

- A. `// Clyde Davis, 9/17/2012. This code validates to HTML5`
- B.
- C. `/*Clyde Davis, 9/17/2012. This code validates to HTML5 */`
- D.

Correct Answer: D

QUESTION 6

A.

This is the text to center

B.

This is the text to center

C.

This is the text to center

D.

This is the text to center

Correct Answer: C

QUESTION 9

Marion has been hired by a popular national salon business to refresh its existing Web site and update it to valid HTML5 code. Money is not an issue, but time is. Marion is asked to complete the project within eight weeks. The site currently includes 10 pages and connects to a back-end database so that customers can sign in for a personalized experience. Marion suspects that most of the existing code will need to be replaced. Marion must ensure that she has plenty of time for the testing phase, so she needs to complete the planning phase, in which she selects the multimedia for the site, within the next couple days. Which strategy should Marion use in the planning phase?

- A. Take pictures of the salons herself.
- B. Purchase stock photos from online resources.
- C. Hire a photographer to take pictures of the salons.
- D. Edit existing images of the salons to update them.

Correct Answer: B

QUESTION 10

Which set of standards developed by the W3C Web Accessibility Initiative (WAI) project provides a universal set of standards promoting accessibility for all Web users, including those with disabilities?

- A. Web Content Accessibility Guidelines
- B. User Agent Accessibility Guidelines
- C. W3C Authoring Tool Accessibility Guidelines
- D. Section 508 of the Rehabilitation Act

Correct Answer: A
