-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

Scenario: Some contractors require access to various corporate applications. They must also be able to install their own applications within the environment for testing purposes. Which two delivery methods fulfill these requirements? (Choose two.)

- A. Hosted server OS with Profile Management enabled
- B. Pooled hosted desktop OS with Personal vDisk enabled
- C. Hosted server OS with persistent server operating system
- D. Assigned hosted desktop OS with persistent desktop operating system

Correct Answer: BD

---

### QUESTION 2

Why does using SmartAuditor help the company comply with its security policy?

- A. Because it is a centralized, industry-standard log that is easily queried
- B. Because it password-protects the audit logs for added security
- C. Because it uses a standard TCP port
- D. Because it collects logs from multiple devices

Correct Answer: B

---

### QUESTION 3

How should the components be set up for this environment?

- A. Configure NetScaler high availability pair. Place the StoreFront servers and Delivery Controllers in the internal network.
- B. Configure NetScaler cluster. Place the StoreFront servers and Delivery Controllers in the internal network.
- C. Configure NetScaler high availability pair. Place the StoreFront servers in the DMZ and the Delivery Controllers in the internal network.
- D. Configure NetScaler cluster. Place the StoreFront servers in the DMZ and the Delivery Controllers in the internal network.

Correct Answer: A

---

### QUESTION 4

How should the architect use XenConvert to facilitate image management?

- A. To convert from a single server image to a hypervisor template
- B. To convert from a single server image into a virtual disk in VHD format
- C. To perform mass conversion of virtual machines to XenServer virtual machines
- D. To perform an unattended conversion of a virtual machine to XenServer

Correct Answer: B

---

#### QUESTION 5

The company is implementing XenDesktop globally for desktop virtualization.

How should the architect recommend installment of controllers for high availability?

- A. Install one controller in London and one in Paris
- B. Install one controller in New York and one in Hong Kong.
- C. Install one controller in Hong Kong and one in Tokyo.
- D. Install one controller in New York and one in London.

Correct Answer: B

---

#### QUESTION 6

Which three statements are true regarding the Radiology group? (Choose three.)

- A. Mobility is important to Radiology users.
- B. Mobility is unimportant to Radiology users.
- C. Virtualization resource requirements are high.
- D. Smooth Roaming is important to Radiology users.
- E. Virtualization resource requirements are moderate.
- F. Smooth Roaming is unimportant to Radiology users.

Correct Answer: BCD

---

#### QUESTION 7

Which two business drivers are critical for the Contractors user group? (Choose two.)

- A. Printing security
- B. Secure remote access
- C. Granular security policies
- D. Support for mobile devices

Correct Answer: BC

---

#### QUESTION 8

How should the architect design the image management process using Windows SysPrep?

- A. Prepare an existing machine as the master image.
- B. Install a new Windows image utilizing a XenServer virtual machine and prepare it as the master image and install the delivery agent. Run SysPrep on the virtual machine.
- C. Use a XenServer virtual machine to install a new Windows image with MAK and prepare it as the master image. Ensure that the image has two network cards.
- D. Run XenConvert on an existing machine.

Correct Answer: C

---

#### QUESTION 9

Scenario: The company is designing a cost-efficient environment for the call center workers. The IT department is replacing the existing thin clients with newer models. What are the benefits of using Hosted VDI with Provisioning Services?

- A. Highest user density and lowest cost
- B. Highest level of user personalization
- C. Rapid provisioning and highest user density
- D. Low cost and highest application compatibility

Correct Answer: C

---

#### QUESTION 10

Why is this the best design for the XenServer resource pools?

- A. This design ensures that all server workloads and virtual desktop workloads are logically separated and do NOT interfere with each other. Furthermore, it ensures easier management and expansion capabilities.
- B. This design provides flexibility for all workloads to use available resources within a resource pool more efficiently and ensures expansion options if the environment should grow. Furthermore, performing a backup on a daily basis provides

availability of critical workloads with some downtime.

C. This design separates server workloads from virtual desktops according to the different resource usage characteristics and avoids conflicting situations. Also, critical database services have sufficient resources within their workload-specific resource pool and failover capabilities.

D. This design ensures logical separation of all workloads and virtual desktops. Also, providing a backup solution reduces the risk of data loss and minimizes downtime.

Correct Answer: C

---

### QUESTION 11

What are the benefits of using a Hosted VDI environment with Personal vDisk?

A. It retains the single image management function while allowing users to install applications.

B. It provides a high level of security while allowing user customization.

C. It has a low storage performance requirement and high user density.

D. It retains the single image management function yet allows application compatibility.

Correct Answer: A

---

### QUESTION 12

Scenario: The company is designing a cost-efficient environment for the call center workers. The IT department is replacing the existing thin clients with newer models. What are the benefits of using Streamed VHD?

A. The ability to use local client hardware

B. Highest level of user personalization

C. Supports a variety of hardware configurations from a single image

D. Remote access to applications

Correct Answer: D
