QUESTION 1

You specified cycle count measurement error values when you defined your item at the master item or organization item level. You also specified a cycle count quantity variance approval tolerance at the cycle count item level. If the actual cycle count quantity for your item differs from the system on-hand quantity by less than the specified measurement error, Oracle Inventory _____.(Select one answer)

- A. does not consider cycle count approval tolerance but makes a cycle count adjustment
- B. applies the measurement error to the cycle count approval tolerance before the approval decision and makes a cycle count adjustment when approved
- C. does not consider cycle count approval tolerance and does not make a cycle count adjustment
- D. applies the measurement error to the cycle count approval tolerance before the approval decision and does not make a cycle count adjustment when approved

Correct Answer: B

- A. Update the ABC class for the item manually in the ABC assignment.
- B. Update the breakpoint assigned to the ABC class and reassign the item automatically.
- C. Purge the ABC assignment, recompile with different a criterion, and reassign the item automatically.
- D. Recompile ABC with a different criterion and reassign the item automatically.

Correct Answer: A

QUESTION 8

If an internal order is not required for the transfer between two organizations, then an interorganizational transfer of material (either direct or intransit type) between the inventory organizations applies to:

1. the transfer of material between inventory organizations across operating units
2. the transfer of material between inventory organizations within the same operating unit

- A. both 1 and 2
- B. 2 only
- C. 1 only

Correct Answer: A

QUESTION 9

What is true about reorder-point planning?

- A. is used for sub-inventory items
- B. is an optional field for all items
- C. is a required field for all items
- D. is required for all non-forecasted items
- E. is required for all forecasted items

Correct Answer: B

QUESTION 10

.com has implement Oracle E-Business Suite 11i. .com has been an Oracle customer since Release 10.7 Character. .com is a global enterprise and constantly ships good between organizations for Manufacturing, Repair, Customer Orders, and so on. .com charges transportation and handling charges on all interorganization transfers, even across operating units. The value that has been transferred recently started to fluctuate widely and erratically. Incorrect cost transfers have made the company's books out of balance, and their inventory valuation is not consistent with corporate standards. Which are four investigative steps that could help you to correct the problem and ensure that correct, consistent amounts are added to each transaction? (Choose four.)

- A. Check the shipping networks for transfer charges that are a required percentage.
- B. Check the shipping networks for transfer charges that are a requested percentage.
- C. Check the shipping networks for transfer charges that are a requested value.
- D. Ensure that the organizations are all standard costing organizations.
- E. Run transaction history report, perform analysis and determine the start day when the transactions were not to standard, and how much they were off.
- F. Setup a keystroke tracing program for all MWA Handheld scanners, to determined exactly who is keying, and what is being keyed in the interorganization transfers.
- G. Run the shipping reports to determine which organizations are causing the problems.

Correct Answer: BCEG
