Exam : **1Z0-581**

Title : Pillar Axiom 600 Storage
System Certified
Implementation Specialist

Version : Demo

1.The storage administrator is viewing the Axiom storage systems and would like to create a volume for the SAN host. Which GUI component is used to manage this task?

A. AxiomONE MaxMan

B. AxiomONE Storage Services Manager

C. AxiomONEStorage Manager

D. AxiomONEQoS Manager

Answer: A

2.The storage administrator is creating a volume and wants to protect it from a full Brick failure. Identify the protection level needed to accomplish this configuration.

A. Standard Redundancy

B. RAID10

C. Double Redundancy

D. assigning the volume toa Storage Domain

Answer: C

3.The development team needs a volume that contains data from the production system for testing. Identify the best Pillar Axiom storage system method that can solve this challenge.

A. Copy LUN

B. Clone LUN

C. Snapshot

D. Clone Volume

Answer: B

4.The storage administrator is creating a LUN. Which organizational units can the LUN be assigned to?

A. Storage Class

B. Typical Access

C. Volume Group D.

Storage Domain

E. Clone LUN Group

Answer: C

5.From which three sources can the system information be collected and placed into the bundle?

A. Slammer hardware components

B. Brick hardware components

C. Client hosts with APM

D. AxiomONEStorage Manager

E. SAN Switch

Answer: A,B,C

6.By using which Pillar Axiom feature can you allocate system resources and handle data flow according to its business priority?

A. Quality of Service

B. Thin Provisioning

C. Storage Domains

D. Storage Profiles

Answer: A

7.Why does it matter if the source power for a PDU is 115v, 208v, or 230v?

A. The Bricks, Slammers, and Pilots will draw different amperes depending on the input to the PDU.

B. The Bricks and Slammers will draw different amperes depending on the input to the PDU but the Pilot will not draw much to make a difference.

C. The Bricks and Pilots will draw the same amperes and not enough to make a difference but the Slammers will draw different amperes depending on the input to the PDU.

D. It does not matter because the Bricks, Slammers, and Pilots will draw the same amperes.

Answer: A

8.Identify the information required during the installation of the Axiom VSS plug-in. Select all that apply.

A. User Name

B. Password

C. System Serial Number

D. VSS Provider Name

E. Port Number

Answer: A,B,C

9.Indentify what must be required in order to receive alerts and email notifications from the Axiom storage system.

A. Email server

B. SNMP host

C. Call Home enabled

D. Primary Administratorcreated

Answer: A
