#### QUESTION 1

What are three common problems for administrators when managing application with network security models that are not virtualized? (Choose three.)

- A. Lack of Interoperability and automation creates error-prone manual work.
- B. Integration of third-party security products with home products is not possible.
- C. Deploying and managing third-party security products become difficult.
- D. Load balancing by vMotion is not possible.
- E. There is limited visibility into a workload's security posture and policies.

Correct Answer: ACE

---

#### QUESTION 2

What are two functions of a DLR control VM (Choose two.)

- A. Communicates with the NSX manager and sends routing updates to the NSX controller.
- B. Performs Address Resolution Protocol (ARP) entry lookup.
- C. Establishes routing protocol sessions with other routers.
- D. Forms adjacencies with edge routing peers.

Correct Answer: AD

---

#### QUESTION 3

Which is the VMware product through which VMware NSX, other than VMware vRealize Automation, provides automation of the entire data center?

- A. vRealize Operations manager
- B. VMware Integrated OpenStack
- C. VMware Site Recovery Manager
- D. VMware vRealize Log Insight.

Correct Answer: B

---

#### QUESTION 4

Which characteristic of VMware NSX enables secure intra-data center network traffic?

- A. Micro-segmentation
- B. Cloud pod architecture
- C. Elasticity
- D. Multi-tenant manageability

Correct Answer: A

---

#### QUESTION 5

Which domain does vSphere/ESXi virtualize for the Software-Defined Data Center (SDDC)?

- A. Applications
- B. Storage
- C. Compute
- D. Network

Correct Answer: B

---

#### QUESTION 6

How can the legacy physical network be simple, stable and reliable when network abstraction is implemented?

- A. By leveraging the existing physical devices without configuration changes
- B. By automating services for provisioning new services.
- C. By configuring new VLANs.
- D. By integrating third-party devices with the existing infrastructure.

Correct Answer: A

---

#### QUESTION 7

What are the two operational modes available with VMware NSX balancer (Choose two.)

- A. Proxy
- B. Setup
- C. Baseline
- D. inline

Correct Answer: AD

---

### QUESTION 8

An administrator wants to provide seamless connectivity between on-premises and hybrid cloud resources. In this scenario which technologies can be incorporated to provide seamless connectivity? (Choose two.)

- A. VMware NSX L2VPN
- B. VMware NSX L4-L7VPN
- C. Site to Site VPN with TLS
- D. Site to site VPN with IPSec

Correct Answer: A

---

### QUESTION 9

Which of these allows static or dynamic grouping based on inclusion and exclusion of objects such as virtual machines, vNICs, cSphere clusters, and logical switches?

- A. uplink
- B. Active Directory (AD)
- C. Port
- D. Security group

Correct Answer: D

---

### QUESTION 10

Which internet security protocol does NSX Edge use to interoperate with all major VPN vendors' equipment?

- A. TLS
- B. TCP/IP
- C. HTTPS
- D. IPSec

Correct Answer: D
