QUESTION 1

Which command-line interface (CLI) utility can a Citrix Administrator use to release the assigned User/ Device licenses to complete a hardware refresh project?

- A. Imadmin
- B. Imreread
- C. Imutil
- D. udadmin

Correct Answer: D

QUESTION 2

A Citrix Administrator wants to use NetScaler Gateway to allow external users to access internal resources securely.

Which three functionalities will the NetScaler Gateway provide to allow access to internal resources on behalf of external users? (Choose three.)

- A. Allow secured external connections to StoreFront (reverse Web Proxy)
- B. Authenticate Users
- C. Enumerate resources
- D. Allow secured access to internal hosted applications (HDX Proxy)
- E. Aggregate resources

Correct Answer: BCE

QUESTION 3

Which two FlexCast models are suitable for applications that are NOT multi-user compatible? (Choose two.)

- A. VM Hosted applications
- B. Hosted shared desktops
- C. Hosted VDI
- D. Published applications

Correct Answer: AC

QUESTION 4

Citrix policies that are created using Citrix Studio are stored in ____ and Citrix policies that are created using Group Policy Management Console are stored in _____. (Choose the correct set of options to complete the sentence.)

- A. Site Database; Site Database.
- B. Configuration Logging Database; Active Directory (AD) Sysvol Share.
- C. Site Database; Active Directory (AD) Sysvol Share.
- D. Delivery Controller local registry; Active Directory (AD) Sysvol Share.

Correct Answer: C

QUESTION 5

Scenario: A Citrix Administrator needs to implement new security standards to protect all internal users\' username and password information within the XenDesktop infrastructure. The administrator must accomplish this task with the least amount of administrative overhead and cost to the company.

What should the administrator deploy?

- A. A Domain SSL certificate on the StoreFront Server(s) and XenDesktop Controller(s)
- B. A third-party certificate on the StoreFront Server(s) and XenDesktop Controller(s)
- C. A third-party SSL certificate on the XenDesktop Controller(s)
- D. A Domain SSL certificate on the StoreFront Server(s)

Correct Answer: A

QUESTION 6

A Citrix Administrator needs to add a VMware ESXi host as a hosting unit in the XenDesktop.

Which three permissions are required by User account to add the VMware ESXi host? (Choose three.)

- A. System.Read
- B. DataStore.AllocateSpace
- C. DataStore.FileManagement
- D. System.View
- E. System.Anonymousx
- F. DataStore.Browse

Correct Answer: ADE

QUESTION 7

A Citrix Administrator received complaints from users that their non-persistent VDIs sometimes crash, causing them to lose files that they are working on.

Which Citrix Profile Management setting can the administrator enable to minimize such file loss?

- A. Cross Platform
- B. Active Write Back
- C. Streaming
- D. Caching

Correct Answer: B

QUESTION 8

Which feature allows users to add and remove applications from the Start Menu on the client workstation?

- A. Local App Access
- B. File-Type Association
- C. Self-Service Mode
- D. Session Reliability

Correct Answer: C

QUESTION 9

A Citrix Administrator needs to configure Store Front for High Availability in order to aggregate resources from multiple deployments.

Which two requirements or restrictions should the administrator consider when deciding to set up highly available multi-site configurations for stores? (Choose two.)

- A. App Controller applications can also be aggregated as long as they have the same name and path on each server
- B. StoreFront only provides access to backup deployments for disaster recovery when all the primary sites are available
- C. While running `Propagate task`, the administrator CANNOT make any further changes until all the servers in the group have been updated
- D. If synchronization of user's application subscriptions is configured between stores on separate StoreFront deployments, the stores must have the same name in each server group

Correct Answer: CD

QUESTION 10

Scenario: A Citrix Administrator is planning to update a Machine Catalog for the first time. The Machine Catalog was created with Machine Creation Services (MCS).

What happens to the identity disk after the update?

- A. It is deleted and recreated
- B. It stays the same size
- C. It doubles in size
- D. It is formatted and re-initialized

Correct Answer: B

QUESTION 11

Which account is used by FlexCast Management Architecture (FMA) services to access the Citrix XenApp and XenDesktop SQL databases?

- A. Network Service Account
- B. Local System Account
- C. Local User Account
- D. Controller\\'s Machine Account

Correct Answer: A

QUESTION 12

Which three features require Citrix XML Service Trust to be enabled within a XenDesktop infrastructure? (Choose three.)

- A. Smart Access Authentication
- B. SAML Authentication
- C. Smart Card Authentication
- D. Pass-Through Authentication
- E. HTTP Basic Authentication

Correct Answer: ACD

QUESTION 13

Scenario: A Citrix Administrator has a current StoreFront store that supports 150 users who have full access to all enterprise resources. The administrator needs to create a new StoreFront store for contractors who will work onsite for two months. The contractors need access to specific resources but will NOT be Active Directory users.

Which option should the administrator select while creating the Store for contractors?

- A. HTTP Basic
- B. Unauthenticated
- C. Pass-through
- D. SmartCard

Correct Answer: B

QUESTION 14

A Citrix Administrator needs to create a policy and configure ____ in order for Citrix Management to process all files for all Domain Users. (Choose the correct option to complete the sentence).

- A. folder inclusion list
- B. file inclusion list
- C. profile store
- D. folder redirection

Correct Answer: A

QUESTION 15

A Citrix Virtual Delivery Agent (VDA) needs to locate the Delivery Controller to register with it.

In which order of precedence, from greatest to least, will VDA locate the Delivery Controller?

- A. Personality.ini file, ListOf DDC's key in the registry, Policy settings from AD, Auto update of controllers
- B. Policy Settings from AD, ListOf DDC's key in the registry, Auto update of controllers, Personality.ini file
- C. Auto update of controllers, Policy settings from AD, ListOf DDC's key in the registry, Personality.ini file
- D. Personality.ini file, Auto update of controllers, ListOf DDC's key in the registry, Policy Settings from AD

Correct Answer: B

Information in the ListOfDDCs and ListOfSIDs can come from several places in a deployment. The VDA checks the following locations, in order, stopping at the first place it finds the lists:

1.A persistent storage location maintained for the auto-update feature. This location contains Controller information when auto-update is enabled and after the VDA successfully registers for the first time after installation. (This storage also holds machine policy information, which ensures that policy settings are retained across restarts.) For its initial

registration after installation, or when auto-update is disabled, the VDA checks the following locations.

2. Policy settings (Controllers, Controller SIDs).

3. The Controller information under the Virtual Desktop Agent key in the registry. The VDA installer initially populates these values, based on Controller information you specify when installing the VDA. 4. OU-based Controller discovery. This is a legacy method maintained for backward compatibility.

5. The Personality.ini file created by Machine Creation Services.
