QUESTION 1

A Citrix Engineer needs to create a Workspace Environment Management (WEM) Delegated Administrator account for a new member of the IT team who needs access to manage System Optimizations such as CPU, RAM, Process Management settings and view the entire console.

Which type of Delegated Administrator should the engineer create for the new member?

A. Full Access

B. Filters Manager

C. Advanced Settings Manager

D. System Utilities Manager

Correct Answer: A

QUESTION 2

Scenario: Users in a XenApp and XenDesktop environment need to access training videos, but CPU resources on the Virtual Delivery Agents (VDAs) should be preserved. However, the access to videos is limited to the VDAs only.

Which multimedia rendering policy should a Citrix configure to meet these requirements?

A. Server fetching and server rendering

B. Media content blocked

C. Client fetching and client rendering

D. Server fetching and client rendering

Correct Answer: D

QUESTION 3

Scenario: A Citrix Engineer recently implemented a Provisioning Services pilot environment, which still has

all the default configurations and uses a standalone SQL Server Express machine to host the Farm

database. Management would like the engineer to expand the environmental so that it can be used to

support several critical use cases within the organization. The farm database must meet these

requirements:

-The solution must ensure that production users are NOT impacted in the event of a database outage.

-The solution must NOT require manual administrator intervention.

-No additional funding is available to accomplish this objective.

Which configuration will meet all the requirements of the scenario?

A. SQL AlwaysOn Availability Group

B. Offline database support

C. SQL Mirroring

D. SQL Clustering

Correct Answer: B

QUESTION 4

Scenario: An application that renders locally and creates a large number of temporary files on the local drive is installed on the Desktop OS machines. A Citrix Engineer creates a vDisk in Private mode with this application installed. The engineer is in the process of updating a vDisk from Private mode to Standard mode and needs to determine the write cache type.

Which cache type would provide the best performance in this scenario?

A. Cache on server

B. Cache on server persisted

C. Cache in device RAM with overflow on hard disk D. Cache on device hard drive

Correct Answer: C

QUESTION 5

How does the Citrix optimization script builder help to adjust the OS Layer?

A. It configures desktops for a VDI environment in the gold image.

B. It updates drivers, checks for Windows updates and runs malware scanners.

C. It improves startup time for desktops in a VDI environment.

D. It automates the Windows setup process for desktops in a VDI environment.

Correct Answer: A

QUESTION 6

What occurs after a Provisioning Services target device downloads or otherwise accesses the bootstrap file?

A. Steady-state streaming

B. The login process

C. IP acquisition

D. Single-Read mode

Correct Answer: B

QUESTION 7

In which scenario should a Citrix Engineer use the Streamed VM Setup wizard instead of the XenDesktop Setup wizard?

A. When using the client-side write cache

B. When automatically adding virtual machines to a machine catalog

C. When integrating XenApp 6.5

D. When using the BDM Disk Partition boot method

Correct Answer: C

QUESTION 8

Scenario: A Citrix Engineer recently implemented Workspace Environment Management (WEM) in an existing XenDesktop infrastructure to include deployment of Agent Host on several Virtual Delivery Agent (VDA) machines. After beginning to configure various global settings for users, the engineer realized that all Agent Hosts should NOT share all the same settings, since each set of users requires different settings and policies for their sessions.

Which option should the engineer configure to provide different settings and policies for user sessions?

A. Use the existing single WEM Site to configure all required global settings and then configure each Agent Host to manage the different settings required for each user session.

B. Use the existing single WEM Site to configure all required global settings and allow the Site to manage the different settings required for each user session.

C. Create additional WEM Sites, then configure each Agent Host to manage the different settings required for each user session.

D. Create additional WEM Sites, set the required settings and policy configurations for each Site, then point each Agent Host to one of the Sites containing it needs to apply to user sessions.

Correct Answer: B

QUESTION 9

What is the default priority order for selecting the preferred zone in a multi-zone XenApp and XenDesktop

environment?

A. User Location; Application Home; User Home

B. User Home; Application Home; User Location

C. Application Home, User Home; User Location

D. User Location; User Home; Application Home

E. Application Home; User Location; User Home

Correct Answer: C

Reference: https://docs.citrix.com/en-us/xenapp-and-xendesktop/7-14/manage-deployment/zones.html

QUESTION 10

In which two instances should a Citrix Engineer merge a vDisk according to Citrix leading practices? (Choose two.)

A. After five vDisk versions are created

B. At scheduled intervals that depend on the frequency of vDisk updates

C. After changes to the vDisk are performed in Private mode

D. Any time a vDisk version is promoted to Test mode

E. Whenever the vDisk Store is at full capacity

Correct Answer: AC

QUESTION 11

How can a Citrix Engineer update applications in an AppLayering environment?

A. Create a new application layer and install the updated version of the application in it.

B. Grant the user administrative rights to update the applications.

C. Install applications with automatic updates into the OS layer.

D. Enable automatic updates in the App Layers.

Correct Answer: A

QUESTION 12

Scenario: A Citrix Engineer is planning to set up a XenApp and XenDesktop environment. The requirements for network security are as follows:

1.

Both external and internal HDX connection traffic must be secured with end-to-end encryption.

2.

Attackers must be prevented from intercepting a user session and viewing sensitive data.

Which two implementations should the engineer include in the environment design to accomplish the requirements? (Choose two.)

A. Workspace Environment Manager

B. TLS enabled on Virtual Delivery Agents (VDAs)

C. HDX Monitor

D. Citrix Gateway HDX Proxy

E. Citrix SD-WAN

Correct Answer: BD

QUESTION 13

Scenario: A Citrix Engineer configured a Provisioning Services server to use 30 streaming ports and eight threads per port. The engineer allocated 8 vCPUS and 64GB of RAM to the server. Two Desktop OS vDisks are in the environment, each with 30GB of disk space.

Which configuration should the engineer perform to enable the Provisioning Services server to support 500 concurrent target device streams?

A. More threads per port should be assigned to the Provisioning Services server.

B. More ports should be assigned to the Provisioning Services server.

C. More CPUs should be added to the Provisioning Services server.

D. More RAM should be added to the Provisioning Services server.

Correct Answer: B

QUESTION 14

Users complain that it is taking longer to access applications now than it did last week.

What is the best way to determine what changed from last week to this week?

A. Review Configuration Logging data.

B. ReviewEdgeSight troubleshooting data.

C. Review EdgeSight Active Application Monitoring data.

D. Review published application properties from a previous version of the datastore with the current version.

Correct Answer: A

QUESTION 15

Which Provisioning Services sub-component is responsible for locking and unlocking vDisk files and reading the vDisk properties file?

A. Stream Service

B. Stream Process Manager

C. SOAP Server

D. MAPI

Correct Answer: B
