QUESTION 3

You want to decrease the implementation time for Order Management by using the Quick Start feature. Select the accurate list of four areas that you can configure by using the Quick Start feature.

A. Objects in receiving, objects in advanced fulfillment, default pick release attributes for the shipping parameters of inventory facilities, and orchestration process for shipping and returning an order

B. Default general shipping parameters, objects in order management parameters, default pick release attributes for the shipping parameters of inventory facilities, and orchestration process for shipping and returning an order

C. Default general shipping parameters, objects in order management parameters, objects in advanced fulfillment, and

orchestration process for shipping and returning an order

D. Objects in advanced fulfillment, default pick release attributes for the shipping parameters of inventory facilities, objects in receiving, objects in order management parameters

E. Default general shipping parameters, objects in receiving, default pick release attributes for the shipping parameters of inventory facilities, and orchestration process for shipping and returning an order

Correct Answer: D

QUESTION 4

Your company wants to notify the external system when there is a high possibility that an order is going to be delayed. Which four steps are required to invoke the external system connector to notify that an order is going to be delayed? (Choose four.)

- A. Set up the lead time for the orchestration steps in the orchestration process definition.
- B. Set up the Use Defined Lead time in the Available To Promise Rule.
- C. Register the web service connector.
- D. Set up the Jeopardy threshold for the orchestration process task.
- E. Create a routing rule for the orchestration process task.
- F. Enable a business event trigger point for Jeopardy and associate the connector.

Correct Answer: ADEF

QUESTION 5

Identify two valid use cases where a process assignment rule is defined to assign an orchestration process. (Choose two.)

- A. When you require one orchestration process for one fulfillment line
- B. When you require multiple orchestration processes for one fulfillment line
- C. When you require one orchestration process for multiple fulfillment lines
- D. When you require one orchestration process for sales order lines

Correct Answer: BC

QUESTION 6

Identify the task that the seeded Warehouse Operator role can perform.

A. Process and confirm outbound shipments

- B. Generate pick slips for picking material for outbound material movement
- C. Generate outbound shipping documentation
- D. Search for a pick slip and confirm it
- E. Monitor and release sales orders for picking in the warehouse

Correct Answer: D

QUESTION 7

Your company wants to define different status conditions for fulfillment lines that have different categories assigned to a single orchestration process in Order Management Cloud. Which two configurations would you perform to meet this requirement? (Choose two.)

- A. Define a fulfillment line status rule set for each category.
- B. Define orchestration process status values for each category.
- C. Assign the status catalog to the orchestration process.
- D. Create a unique step for each category and assign different "next expected task statuses".
- Correct Answer: BC

QUESTION 8

A global Power Systems manufacturer sells Uninterrupted Power Supply (UPS) products through its online portal. To gain competitive advantage, the manufacturer wants to enhance the ability of buyers to select a desired configuration of the

high-end UPS models through guided selling options on its online selling portal. The company\\'s product development team has finalized the enhancements and needs your help to get them implemented on their online selling portal that is

supported by Oracle Cloud Configurator. (Choose four.)

What four actions would you take in Oracle Cloud Configurator to enhance a buyer\\'s experience?

- A. You can display product reviews of customers who have purchased the same configuration earlier.
- B. You can create rules that will guide users in creating a valid model.
- C. You can allow buyers to raise requests if an expected product functionality is not offered.
- D. You can test the behavior of the configured model anytime when you are editing it.

E. You can create enhancements to the model structure that supplements the imported configurable structure of a model item.

F. You can enable a checkout option for a model when a valid configuration is finalized.

G. You can create user interfaces that will be dynamically presented to users based on the options chosen in the Configurator model.

Correct Answer: BEDG

QUESTION 9

Your customer is concerned about not having access to schedule orders and check availability when the Global Order Promising server is down. Which two statements are true? (Choose two.)

A. Affected orders cannot be rescheduled based on supply chain availability search after server recovery.

B. Global Order Promising cannot continue promising orders, but the server or backup server is usually restarted quickly.

C. Global Order Promising continues promising orders based on supply chain availability search until the server or backup server can be restarted.

D. Affected orders can be rescheduled based on supply chain availability search after server recovery.

E. Global Order Promising continues promising orders based on lead-time availability until the server or backup server can be restarted.

Correct Answer: CD

QUESTION 10

How can split fulfillment lines in Order Management be managed independently?

A. Split fulfillment lines can be managed independently because they are often being shipped from different warehouses.

B. Split fulfillment lines can be managed with an orchestration process instance that has been created for them.

C. Split fulfillment lines cannot be managed independently.

D. Split fulfillment lines can be managed dependently because they have different attributes.

Correct Answer: B

QUESTION 11

Which Oracle Transactional Business Intelligence subject area should you use to build an online custom report that shows the number of orchestration orders for a selected orchestration process status?

- A. Distributed Order Orchestration- Order Lines Real Time
- B. Distributed Order Orchestration- Process Instances Real Time
- C. Distributed Order Orchestration- Process Instances

D. Distributed Order Orchestration- Fulfillment Lines Real Time

Correct Answer: B

QUESTION 12
