QUESTION 3

What Expression Language does Decision Modeling and Notation (DMN) use?

- A. RegEx
- B. Groovy
- C. Friendly Enough Expression Language (FEEL)

D. Process Expression Language (PEL)

Correct Answer: C

Explanation: <https://docs.oracle.com/en/cloud/paas/process-cloud/user/understanding-feel-friendly-enough-expression-language.html>

QUESTION 4

Which schema is used for defining the field structure of an analytic object?

- A. Apache Avro schema
- B. XSDschema
- C. Database schema
- D. XSL Schema

Correct Answer: A

Explanation: Using Schemas to Define the Fields of Analytics Objects You can import an Apache Avro schema file to define the field structure of your analytics object. To import a schema file, your analytics object must not have any fields

After you create your analytics object, click Import Schema.

The file browser dialog box appears.

Select a valid Avro schema file from your computer and click Open. For more information about Avro schemas, see Apache Avro. The field structure defined in the schema file appears in the Fields section.

Click Save.

The field structure defined in your Avro schema file is imported to your analytics object.
