QUESTION 1

Which two statements are true about shapes?

A. A shape defines how much CPU and memory resources are consumed by the operating system running on the VM.

B. Shapes define the combination ofcomputer power, memory, and number of threads enabled.

C. A range of shapes (combination of compute power and memory) is available to select for VMs.

D. A shape defines the number of Oracle Compute Units (OCPUs) and the amount of RAM available for a virtual machine (VM).

E. A shape defines the number of Oracle Compute Units (OCPUs) equivalent to an Intel processor.

Correct Answer: BE

QUESTION 2

You have created a container in Oracle Storage Cloud Service. How would you upload a file to that container when using a REST API call?

A. You cannot upload files using REST API calls.

B. Send a PUT request to{accountURL}/{containerName}.

C. Send a PUT request to{accountURL}/{containerName}/{objectName}.

D. Send a POST request to{accountURL}/{containerName}/{objectName}.

E. Send a POST request to{accountURL}.

Correct Answer: C

QUESTION 3

Which two methods can customers use to control and secure their data in Oracle Storage Cloud Service?

A. Set up RSA read and write key pairs on containers.

B. Through RESTful web services, invoke Oracle Data Masking on objects stored.

C. Use the Java client to encrypt data when stored and decrypt data whenretrieved.

D. Assign read and write permissions to containers to restrict access to data.

E. Through RESTful web services, invoke SPARC M7 processor 128-bit encryption.

Correct Answer: CD

QUESTION 4

What type of storage capacity do block storage volumes provide?

A. shared storage for applications on virtual machines (VMs) in Oracle Compute Cloud Service

B. discrete storage disks that can be attached to virtual machines (VMs) in Oracle Compute Cloud Service

C. scalable object storage in the cloud

D. infinitely scalable storage for virtual machines (VMs) in Oracle Compute Cloud Service

E. geo-replicated storage in the Oracle Public Cloud for any application running on- premises

Correct Answer: C

QUESTION 5

Your Oracle Storage Cloud Service is provisioned at Oracle\'s Chicago data center. Your data center is collocated with the Oracle data center in Chicago. There is a requirement to access Oracle Storage Cloud Service over a dedicated connection.

Which service would you use to accomplish that requirement?

A. Oracle Network Cloud Service MPLS ?Site-to-Site VPN

B. Oracle Network Cloud Service ?FastConnect Partner Edition

C. Oracle Network Cloud Service ?FastConnect Standard Edition

D. Oracle Network Cloud Service ?Corente VPN

E. iPaaS VPN

Correct Answer: A

QUESTION 6

Which method would you use to provision block storage capacity for virtual machines (VMs) in Oracle Compute Cloud Service?

A. Attach containers in OracleStorage Cloud Service to VMs.

B. Deploy Oracle Storage Cloud Software Appliance in your data center.

C. Create storage volumes in Oracle Compute Cloud Service and attach the volumes to VMs.

D. Set up a ZFS storage appliance on-premises and connect OracleCompute Cloud Service VMs to the appliance.

E. Block storage capacity is provisioned automatically when VMs are created in Oracle Compute Cloud Service.

Correct Answer: C

QUESTION 7

Which two networking tasks should you complete in Oracle Compute Cloud Service before provisioning Oracle Storage Cloud Software Appliance ?Cloud Distribution?

A. Create a security rule identifying which gateways can be added.

B. Create a security rule to enable NFS access from the appliance instance to the client instances.

C. Create a security rule to enable NFS access from the client instances to the appliance instance.

D. Create a security application with TCP protocol to enable JDBC access.

E. Create a security list to which the appliance instance can be added.

Correct Answer: CE

QUESTION 8

What is the minimum file size that can be uploaded as a Dynamic Large Object (DLO)?

A. There is no minimum size.

B. 1 MB

C. 2 MB

D. 5 GB

E. 10 GB

Correct Answer: A

QUESTION 9

A customer who uses Oracle Storage Cloud Service seeks a more automated method, instead of using the REST API and manually entering the cURL commands. Which service should the customer implement?

A. Oracle File Transfer Appliance

B. Oracle Storage Cloud Software Appliance

C. Oracle Data Transfer Service

D. Oracle Documents Cloud Service

Correct Answer: A

QUESTION 10

After subscribing to an Oracle Cloud service, what is your next step?

A. E-mail your Oracle representative for the activation key.

B. Log in to My Oracle Support (MOS) and verify that the service has been added to your account and has been activated.

C. On the Oracle Cloud My Services page, verify that the subscribed service is active.

D. Start using the service.

E. Deploy the service.

Correct Answer: B

QUESTION 11

Which four characteristic of an instance can be determined by the machine image?

A. the RAM allocated to an instance

B. the size of theboot disk of the instance

C. the default users created on the instance

D. password-less access to the instance

E. packages installed on the instance

F. IP addresses allocated to an image

Correct Answer: BCEF

QUESTION 12

A customer with a large number of VMware and Kernel-based Virtual Machines (KVMs) has a requirement to eliminate their VM sprawl and consolidate images. What Oracle Infrastructure as a Service solution would you implement to help them?

A. Oracle VM Migrator to convert their VMs to Oracle VM Management Cloud

B. Oracle Java Cloud Service to rewrite and migrate their application-based virtual machines (VMs) to the Oracle Cloud

C. Oracle Ravello to encapsulate their multi-VM applications and run them in the Oracle Cloud

D. Oracle Document Cloud Service to publish their virtual machines (VMs)

Correct Answer: C
