QUESTION 1

Which are three use cases in which SQL Performance Analyzer can be used?

- A. find and flashback explain plan anomalies
- B. simulate Exadata on existing hardware
- C. forecast impact of a system change on aSQL workload
- D. compare performance of SQL statements before and after a change
- E. debug SQL code syntax before and after a change
- F. JSQL Heap Memory overflow testing

Correct Answer: BCE

QUESTION 2

A customer has database performance issues within their Oracle Real Application Cluster. What is the next step?

- A. Run the V\$RAC script to dump all the RAC statistics and look for what has the highest metric accumulation.
- B. Use the application load testing utility to overload a copy of their application in development to flush out the issue.
- C. Turnoff RAC interconnects to isolate any network issues impacting database performance problems.
- D. Use a third-party RAC tool to identify the bad SQL and then rewrite it.
- E. Utilize the Oracle Database Performance Method to help identify and correct issue.

Correct Answer: E

QUESTION 3

Which four use cases could Database Replay be used to test for database performance changes?

- A. a change in operating system versions
- B. compare Flashback workload
- C. check a workload from a single instance on an Oracle RAC database
- D. check a workload after database parameters have been changed
- E. check a workload from one database release on another database released
- F. upgrade an application

Correct Answer: BCDE

QUESTION 4

Upon implementation completion, which three should be reviewed with a customer to confirm the values or benefits of a Oracle Database Performance and Tuning solution?

- A. real-time and historical monitoring capabilities
- B. non-intrusive metric collections
- C. statspack integration and support
- D. integration with Enterprise Manager
- E. included scripts for querying X\$ and V\$ views
- F. SQL script code management capabilities

Correct Answer: ABD

QUESTION 5

Which option is recommended when gathering Optimizer system statistics on a regular basis to ensure optimal performance?

- A. lock out user sessions and gather system statistics overnight
- B. gather system statistics after a performance issue has been reported
- C. gather system statistics for several hours when there is no workload
- D. gather system statistics for several hours during normal workload periods
- E. shut down any running applications prior to collection

Correct Answer: D

QUESTION 6

Which statement about Oracle Enterprise Manager Database Express is correct?

- A. Oracle Enterprise Manager Database Control must be configured first.
- B. The listener needs to be running for it to be accessed.
- C. A Oracle Enterprise Manager Database Express WebLogic Server must be configured first.
- D. Oracle Internet Application Server needs to be installed to use it.
- E. Oracle Enterprise Manager Database Express can be used only from a command-line.

Correct Answer: A

QUESTION 7

Identify four problems automatically diagnosed by Automatic Database Diagnostics Monitor (ADDM).

- A. log file sizing
- B. log buffer sizing
- C. log file problematic naming
- D. Mean Time to recover (MTTR) setting
- E. undersized SGA or PGA
- F. oversized SGA or PGA
- G. Less Time to recover (LTTR) setting

Correct Answer: DEFG

QUESTION 8

DBAs use scripts and a third-party tool that access Automatic Workload Repository (AWR) snapshot reports, but don't use Oracle Enterprise Manager. The IT Manager seeks to confirm what the DBAs told him - Its OK since they licensed Oracle Database Enterprise Edition and not the Standard Edition. Which is the correct response for this scenario?

- A. With an Oracle Enterprise Edition Database license, a customer can use any Oracle option they want, at any of their worldwide locations, without additional licensing.
- B. No matter how AWR snapshot reports are accessed, Oracle Enterprise Edition Database customers need to be licensed for the Oracle Diagnostic Pack for Oracle Databases.
- C. With an Oracle Database Enterprise Edition license, an Oracle customer can use any Oracle option they want, at that location, without additional licensing.
- D. No matter how AWR snapshot reports are accessed, Oracle Enterprise Edition Database customers need to be licensed for the Advanced Analytic Pack for Oracle Databases.
- E. With an Oracle Database Enterprise Edition license, an Oracle customer can access AWR snapshots by using SQL. If you use anything else, then you need an additional license.

Correct Answer: C

QUESTION 9

Which is a prerequisite for using an Oracle Database Performance and Tuning solution?

- A. Linux Operating system
- B. 8 GB of memory

- C. Oracle Database Enterprise Edition
- D. Oracle Enterprise Manager
- E. deep knowledge of Oracle Storage subsystems

Correct Answer: C

QUESTION 10

Select two scenarios that an Oracle Database Performance and Tuning solution implementation addresses.

- A. After migration off a legacy system, an ERP team complains that they have no ability to isolate performance problems in the new distributed Oracle Database architecture.
- B. An HR Team claims that it can hire staff fast enough to meet business demands.
- C. Development Team members demand that their SQL should run fast while the DBAs blame SQL as the root of performance issues.
- D. To prepare for an upcoming code audit, developers need to review their SQL and PL/SQL code for syntax and runtime errors.
- E. Systems and Storage teams report that over the past 12 months, it is taking 40% longer time to back up these servers with Oracle databases on them.

Correct Answer: BC

QUESTION 11

To use Automatic Database Diagnostic Management capability on a database using a SQL script, command line, database views, or from a GUI, which option needs to be licensed?

- A. Oracle Diagnostics Pack for Oracle Databases
- B. Oracle Tuning Pack for Oracle Databases
- C. Oracle Diagnostics and Tuning Pack for Oracle Databases
- D. Oracle ADDM Pack
- E. Nothing else needs to be licensed.

Correct Answer: C

QUESTION 12

When managing multiple database instances on a single server, which initialization parameter limits the number of CPU's that an instance can use simultaneously?

- A. CPU_NUM

- B. NUM_CPU
- C. MAX_CPU
- D. LIMIT_CPU
- E. CPU_COUNT

Correct Answer: E

QUESTION 13

When implementing an Oracle Database Performance and Tuning solution, which are three product technologies recommended for use as your base configuration?

- A. SQL Tuning Pack for Oracle Database
- B. Oracle Tuning Pack for Oracle Database
- C. Oracle Performance Pack for Oracle Database
- D. Oracle Diagnostics Pack for Oracle Database
- E. Oracle Real Application Testing
- F. Oracle SQL Developer
- G. STATSPACK

Correct Answer: BDE

QUESTION 14

Which one is a type of user session and client request supported by Database Replay?

- A. XA transactions
- B. Oracle Call Interface (OCI) based object navigations
- C. SQL-based object access
- D. Flashback queries
- E. Database Resident Connection Pooling (DRCP)

Correct Answer: C

QUESTION 15

Which option would you use to capture workloads from one or more systems concurrently and then play them back?

- A. Automatic Workload Repository
- B. Enterprise Manager Cloud Control
- C. Consolidated Database Replay
- D. Consolidation Planner
- E. Workload Consolidator and Playback

Correct Answer: C
