QUESTION 1

During the Design phase of implementing Oracle Product Hub Cloud, you are asked to review the existing processes of Catalog sharing. You decide to add a Category to the Catalog for sharing.

What are the four business benefits of this decision?

A. The Category hierarchy and any assigned items to the Categories in the shared content can be referenced within the Catalog.

B. The complete Category hierarchy in the shared content can be referenced within the Catalog if the items are not assigned to Categories.

C. The referenced content can belong to only one Category if a Category hierarchy exists.

D. The referenced content can belong to more than one Category.

E. The Source Catalog content can be shared with multiple Catalogs.

F. The Catalog contents can be maintained in a single place.

Correct Answer: ADEF

During the creation of the catalog, sharing can be enabled by specifying a single source catalog that will be used for sharing by reference and setting the value of the sharing content to control what content will be shared from the source catalog. The advantage of using sharing by reference is source catalog content can be shared to multiple catalogs and maintained in a single place, the source catalog. In addition, the referenced content can be more than one category, for example a complete category hierarchy and any assigned items to categories in shared content can also be reference within the catalog.

QUESTION 2

You have created an implementation project in Functional Setup Manager (FSM) and your customer has a new requirement to enable the Item Rules option on the Configure Offerings page. However, the tasks related to Item Rules are not available to you.

What are two reasons for this behavior?

A. The offerings for the selected implementation project are not re-provisioned.

B. The related tasks are not assigned to you.

C. The newly generated tasks are not manually included in the implementation project.

D. The implementation status for the Item Rules option has not changed to Started.

Correct Answer: BC

QUESTION 3

Which statement is false in regard to Smart spreadsheets?

A. Smart Spreadsheets contain all attributes as defined for the Item Class.

B. Smart Spreadsheets can be generated for all the installed languages.

C. Smart Spreadsheets have built-in functionalities to perform multiple validations as data is keyed in.

D. Suppliers can use smart spreadsheets to prepare high-quality data off-line.

Correct Answer: B

QUESTION 4

Oracle Product Data Quality has standard validation rules that can be used to overcome data quality issues. Identify three events where they are applied.

A. when exporting a batch of items

B. when running a BI report that identifies data quality

C. when editing an item

D. when creating multiple items

E. when implementing a batch of items

Correct Answer: CDE

QUESTION 5

What are the three upload options available to add items to a batch by using the Oracle Product Hub Cloud User Interface?

A. From an xml file by using import maps

B. From an xml file by using iSetup

C. From a spreadsheet by using ADFDi

D. From a text file by using import maps

E. From a text file by using ADFDi

Correct Answer: ABD

QUESTION 6

Your organization has a need to use multiple catalogs and share categories across catalogs. Which four options apply to Catalog sharing?

A. Changing the catalog security from public to private might impact the catalogs that are sharing the category by reference.

B. Public catalog categories can be shared across multiple catalogs.

C. Source categories by copying from multiple catalogs.

D. Public catalog categories cannot be shared across multiple catalogs.

E. Multiple catalogs can share the same category by reference sharing.

F. Items cannot be assigned to multiple shared catalogs.

Correct Answer: BEF
