QUESTION 1

A customer notices a failed drive error for a Vblock System 320 storage array on an EMC Unisphere screen.

Which logs must be collected and sent to VCE support to confirm that the drive has failed?

- A. SPcollects
- B. NAR files
- C. symapi.log
- D. EMC Grab

Correct Answer: A

QUESTION 2

Which EMC software is required to initialize a Vblock System 200 storage array?

- A. Unisphere Service Manager
- B. Unisphere Server Utility
- C. VNX Installation Assistant
- D. Unisphere Client

Correct Answer: C

QUESTION 3

VCE Vision Intelligent Operations has been installed on a customer's Vblock System.

Which two parameters would be selected within the configureSNMP command? (Choose two.)

- A. delete trap target
- B. sysContact
- C. add v1/v2c trap target
- D. sysLocation

Correct Answer: AC

QUESTION 4

VCE support asks you to collect VMware diagnostic logs from an ESXi host.

Which two management tools would you use to accomplish this task? (Choose two.)

- A. vSphere Client connected to ESXi host
- B. VMware Update Manager (VUM) server
- C. vSphere client connected to vCenter Server
- D. VMware vCenter SQL database

Correct Answer: AC

QUESTION 5

Which Cisco management software is required to setup EMC e-mail home for Cisco MDS switches?

- A. Cisco Data Center Network Manager (Cisco DCNM-SAN)
- B. Cisco Unified Computing System Manager (Cisco UCSM)
- C. Cisco Smart Call Home (Cisco SCH)
- D. Cisco Terminal Access Controller Access Control System (Cisco TACACS)

Correct Answer: A

QUESTION 6

Which type of ODBC (DSN) connection is required for VMware Update Manager?

- A. Microsoft SQL 64 bit
- B. Microsoft SQL User DSN
- C. Microsoft SQL 32 bit DSN
- D. Microsoft File DSN

Correct Answer: C

QUESTION 7

You want to use vMotion to move the entire state of a running virtual machine between hosts over a dedicated vMotion network without service interruption.

What are two vMotion prerequisites before performing this task? (Choose two.)

- A. Verify that you have at least two ESXi hosts that are licensed for vMotion or are in evaluation mode
- B. Verify that you have running instances of vCenter Server and the ESXi hosts are in maintenance mode.

- C. Verify that hosts have access to shared storage of a supported type, such as Fibre Channel, iSCSI, or NAS
- D. Verify that the source and destination hosts have specific Intel x86 CPUs.

Correct Answer: AC

QUESTION 8

The implementation profile located in the Logical Configuration Survey (LCS) identifies if the customer will be using which two solutions? (Choose two.)

- A. EMC SnapView
- B. Cisco IAC
- C. Cisco Unified Communications
- D. VMware vCloud Director

Correct Answer: CD

QUESTION 9

In Cisco UCSM, which policy allows you to enable the Cisco Discovery Protocol (CDP)?

- A. Adapter Policy
- B. Dynamic vNIC Connection Policy
- C. QoS Policy
- D. Network Control Policy

Correct Answer: D

QUESTION 10

Which test is only performed on a Vblock System 320 that contains a high availability Advanced Management Pod (HA-AMP)?

- A. Cisco blade server failure test
- B. Cisco UCS single power supply failure test
- C. Cisco Catalyst 3560 failure and recovery test
- D. Cisco UCS C220 failover test

Correct Answer: D

QUESTION 11

What are three possible results when enabling vSphere High Availability (HA)? (Choose three.)

- A. Virtual machines will migrate from one host to another as resource availability changes.
- B. An ESXi host fails and some of the virtual machines restart on other hosts in the cluster.
- C. A virtual machine fails and automatically restarts on another host in the cluster.
- D. VMware vSphere Fault Tolerance will be enabled.
- E. A virtual machine is unable to boot due to limited cluster resources.

Correct Answer: BCE

QUESTION 12

What is a reason to use EMC Powerpath/VE on a Vblock System 720?

- A. to provision storage from the vCenter client
- B. to optimize load balancing on the storage fabric
- C. to add additional vStorage APIs for Array Integration (VAAI) features
- D. to optimize storage caching features on the ESXi host

Correct Answer: B

QUESTION 13

What is the data store location for Management Virtual Machines, in the high availability Advanced Management Pod (HA-AMP)?

- A. EMC VNXe
- B. EMC VNX
- C. Cisco UCS C220
- D. Cisco UCS B440

Correct Answer: A

QUESTION 14

During a Vblock System 320 deployment, the customer wants to disassociate four half-width blades in a single chassis for a future project.

Which tool is used to perform this compute reconfiguration?

- A. vSphere
- B. CIMC
- C. Unisphere
- D. UCSM

Correct Answer: D

QUESTION 15

Which three configuration parameters are available to create a virtual machine when performing a typical installation?
(Choose three.)

- A. data store location
- B. virtual disk size
- C. virtual machine hardware version
- D. primary network connection
- E. number of vCPUs

Correct Answer: ABD
