QUESTION 1

A customer wants to take an existing VCE Vblock® System compliance policy and tailor it to their environment. Which element manager would you recommend?

- A. VCE Vision™ Intelligent Operations
- B. UCSM
- C. Unisphere
- D. vCenter

Correct Answer: A

QUESTION 2

You are asked to create a series of LUNs within a storage pool that will be used as VMFS data stores and you are unsure what the performance requirements will be.

According to EMC, which FAST Tiering Policy should you use?

- A. Auto-Tier
- B. Start High then Auto-Tier
- C. Highest Available Tier
- D. Lowest Available Tier

Correct Answer: B

QUESTION 3

What is the EMC-defined best practice for LUN ownership across storage processors on a Vblock® System 340?

- A. Dedicate SP ownership; even numbered blade server LUNs are owned by SP A and odd numbered blade server LUNs are owned by SP B.
- B. Dedicate SP ownership; odd numbered blade server LUNs are owned by SP A and even numbered blade server LUNs are owned by SP B.
- C. Alternate SP ownership; even numbered LUNs are owned by SP A and odd numbered LUNs are owned by SP B.
- D. Alternate SP ownership; odd numbered LUNs are owned by SP A and even numbered LUNs are owned by SP B.

Correct Answer: C

QUESTION 4

You are configuring UCS backup operations to send data from a remote office to a central repository, but the internal firewall is preventing these jobs from succeeding.

Which three protocols must be allowed through the firewall? (Choose three)

- A. HTTP
- B. SCP
- C. FTP
- D. RSH
- E. TFTP

Correct Answer: BCE

QUESTION 5

A new Vblock® System 720 customer is interested in managing initiator groups and monitoring virtual provisioning.

Which element manager would you recommend?

- A. VCE Vision™ Intelligent Operations
- B. Unisphere
- C. UCSM
- D. Data Center Network Manager

Correct Answer: B

QUESTION 6

What are three supported disk types for a Vblock® System 720? (Choose three)

- A. EFD
- B. FC
- C. SAS
- D. SATA
- E. NL_SAS

Correct Answer: ABD

QUESTION 7

You are managing a Vblock® System 340 and need to configure an additional ESXi server. After loading the server, you need to provision a few data devices to the host.

According to VCE best practices, which starting LUN ID should be used for these data devices?

- A. 10
- B. 32
- C. 100
- D. 132

Correct Answer: D

QUESTION 8

A customer is interested in executing the VCE Vision™ Intelligent Operations Compliance Checker. What is required to access the local RCM data?

- A. CAS authentication credentials for the administrator
- B. vSphere administrator credentials
- C. Administrator authentication to VCE Vision™ Intelligent Operations
- D. Full access rights to the RCM

Correct Answer: A

QUESTION 9

You have deployed a pool of UCS blades to support a development environment that is managed by a development support team. The development support team requires console access to their blade servers. You created a role in the UCSM that only allows console access and power operations.

Which mechanism is used to ensure that you only assign the development support team to the blade servers that they support?

- A. Multi tenancy policies
- B. Isolation pools
- C. Service profiles
- D. Organizations

Correct Answer: D

QUESTION 10

You are deploying a new customer application on virtual machines. The application team has decided to implement an external load balancer for this application but wants to ensure that all the virtual machines are running on different ESXi hosts.

Which action should you perform to meet the application team's requirement?

- A. Apply a DRS VM-VM affinity rule on your VMware cluster for the application virtual machines.
- B. Apply an HA VM-Host affinity rule on your VMware cluster for the application virtual machines.
- C. Create a vAPP and create a vAPP affinity rule on your VMware cluster for the application virtual machines.
- D. Configure the application virtual machines to use VMware Fault Tolerance affinity rules.

Correct Answer: A

QUESTION 11

You are adding an NFS volume to an ESXi host.

Which two steps are required to accomplish this task? (Choose two)

- A. Assign a VLAN to the vmkernel interface.
- B. Create a network label to identify the connection.
- C. Choose the NFS folder name in the format /vol/mounts/datastore1.
- D. Choose Network File System as the storage type.

Correct Answer: CD

QUESTION 12

You are required to physically move a blade from one UCS chassis to another UCS chassis. What must be done to the service profile in the UCSM before moving the blade?

- A. Shut down the server.
- B. Start fault suppression.
- C. Unbind from the template.
- D. Disassociate the service profile.

Correct Answer: D

QUESTION 13

You are using expandable resource pools in your VMware cluster to ensure each environment is allocated the appropriate resources. There is a resource pool for your development environment that has a reservation of 5 GHz CPU

and 12 GB of memory. There is a child resource pool of the development resource pool named Sandbox that has a reservation of 1 GHz CPU and 4 GB of memory. You create four new virtual machines with 4 GB of memory in the Sandbox environment.

In this scenario, which statement is true?

- A. Only one of the new virtual machines will power on.
- B. All new virtual machines will power on.
- C. Only three of the new virtual machines will power on.
- D. No new virtual machines will power on.

Correct Answer: B

QUESTION 14

Which two elements are required to configure a SAN boot policy? (Choose two)

- A. boot target naai ID
- B. boot target CHAP authentication
- C. boot target LUN
- D. boot target WWPN

Correct Answer: CD

QUESTION 15

What is the interface used to administer physical servers in a Vblock® System 200?

- A. CIMC
- B. DCNM
- C. UCSM
- D. Unisphere

Correct Answer: A
