Correct Answer: B

QUESTION 6

A System Manager is creating a production for a case. The production must produce all non-Excel file types in TIFF format and produce all Excel files in native format. All files should be named with a production number. How should this production be created?

- A. use a Mixed Mode production, with all non-Excel files in TIFF format, named with production numbers; use Metadata export for the Excel files and use option to include native copies
- B. produce all non-Excel files in TIFF format, named with production numbers; use Native Only export for the Excel files
- C. produce all non-Excel files in TIFF format, named with production numbers; produce all Excel files in Native Only format, named with production numbers
- D. use a Mixed Mode production, with Excel files produced natively and all other files produced in TIFF format; all files named with production numbers

Correct Answer: D

QUESTION 7

A portion of the expected data from the last collection in a Litigation Case is missing. A new collection has been created, but it will result in additional Active Directory custodians and exceed the collection license. In addition, an HR-Audit with multiple backups occurred during the case with a different set of Active Directory custodians. This is a historical case,

but it will need to be retrieved occasionally. How can a new collection be run without exceeding current license capacity?

- A. back up HR-Audit case and then delete it; restore the case when needed
- B. back up HR-Audit case without deleting it; restore the case when needed
- C. archive HR-Audit case and select convert all backups to archives; restore the case when needed
- D. archive HR-Audit case and select the option "Convert all backups to a single archive"; restore the case when needed

Correct Answer: C

QUESTION 8

The mail server used by the Symantec Clearwell eDiscovery Platform 7.x has been changed to a new server during an organization's Exchange migration. New hold notices are now failing. Which configuration changes should be made in the system area?
