QUESTION 1

An Inbound exception class called /Inbound/Vlan10 is created using a VIAN ID as criteria to identify traffic in the matching rule. Which result occurs?

- A. All traffic marked with the VIAN ID is classified by the exception class
- B. An error occurs; classes that use VIAN IDs as criteria cannot be set as exception classes
- C. All traffic marked with the VIAN ID is assigned a new priority level
- D. Nothing occurs; PacketShaper does not intercept VIAN traffic

Correct Answer: D

QUESTION 2

What does the "setup reset cleat" command enforce, that the "setup reset all*" command does NOT?

- A. It dears all files on the "/public" folder, ME data, and RAD1US/IACACS* information
- B. It restores measurement data files to the measurement directory
- C. It discards the current configuration and resumes operation using the loaded configuration files
- D. It sets the appliance's management IP address to 10.10.10.1

Correct Answer: A

QUESTION 3

Which class will automatically be at the highest point in the traffic tree?

- A. The Default bucket
- B. TCP Discovered_PoH_123
- C. Any class with an IP address
- D. HTTP which was auto-discovered

Correct Answer: C

QUESTION 4

Two classes need to be created; a Citrix class that matches traffic by client name, an HTTP class that matches traffic by user-agent had URL. Which command helps determine the matching rules?

- A. class criteria
- B. traffic history
- C. class capture-IDs
- D. traffic flow

Correct Answer: D

QUESTION 5

Which PacketShaper report displays the percentage of bytes that are NOT retransmits?

- A. The TCP Health graph
- B. The Network Efficiency graph
- C. The Normalized Network Delay graph
- D. The Top 10 Classes graph

Correct Answer: B

QUESTION 6

What are the two (2) main functions o(the Symantec PacketShaper? (Select two)

- A. Control of network traffic
- B. Next generation firewall
- C. Network traffic visibility
- D. Increased bandwidth
- E. Secure transparent proxy

Correct Answer: AC

QUESTION 7

Which scenario would the "burstable al priority" attribute be used in?

- A. To enable a traffic class to access unused bandwidth at Priority 3 or above
- B. When a limit is specified that is less than the policy's guaranteed rate
- C. When a limit is specified that is greater than the policy's guaranteed rate
- D. To enable a traffic class to access unused bandwidth at a specified priority level

Correct Answer: B

QUESTION 8

Which option best describes the concept of "Round Trip" as defined in the Monitor Response Time window?

- A. The percentage of transactions completed within the total delay threshold when a client and server exchange of S/N and ACK packets
- B. The average time in milliseconds from the sending of a client's SYN packet, to the return of the server's ACK packet
- C. A network delay or server delay threshold that has been set via the command-line interface
- D. The average time in milliseconds certain transactions use, categorized as total, network, and server delays

Correct Answer: C

QUESTION 9

When would the traffic class Inbound/HTTP inherit its policy from another class?

- A. When Inbound/HTTP has an ignore policy applied
- B. When Inbound/HTTP has a rate policy applied
- C. When Inbound/HTTP has a priority policy applied
- D. When Inbound/HTTP does not have a policy applied

Correct Answer: D

QUESTION 10

What is required on the network to allow classification of traffic flow by a specific user?

- A. Install the Blue Coat Authentication and Authorization Agent (BCAAA) on a separate server.
- B. Nothing. Users are automatically discovered by your PacketShaper.
- C. Enable Users and Groups on the PacketShaper Setup page.
- D. Install the Blue Coat Authentication and Authorization Agent (BCAAA) on your PacketShaper appliance.

Correct Answer: A

QUESTION 11

Which CLI command will display the current rate and connection information about active hosts?

- A. hostdb hosts
- B. hostdb accounting
- C. hostdb info
- D. hostdb show

Correct Answer: B

QUESTION 12

What does "network delay" mean within PacketShaper?

- A. The time lot the Oracle server to access memory
- B. The increase in average transaction
- C. The total transit time for a single packet to traverse the PacketShaper interfaces
- D. The total transit time for all requited packets

Correct Answer: D

QUESTION 13

Why would an administrator configure the failover feature in PacketShaper Guided Setup?

- A. To enforce policies to react to a new link speed when the primary WAN link fails

- B. To configure advanced system settings, such as Packet Engine, auto discovery, and dynamic partitions
- C. To configure PacketShaper for use with WCCP when the primary WAN link fails
- D. To schedule commands to execute at a specific time or on a recurring basis

Correct Answer: B

QUESTION 14

Which element is missing from this class list statement? # class test outbound 10.0.0.200:21 10.0.12.100:2000

- A. Partition
- B. Policy
- C. Protocol
- D. Traffic class

Correct Answer: A

QUESTION 15

Which three (3) criteria are to be specified in a matching rule? (Select three)

- A. Service group
- B. Diffserv marking
- C. Traffic type
- D. SSL URL P
- E. Interface
- F. VLAN identification

Correct Answer: ABC
