QUESTION 1

A technician has been asked to apply an Application Sequence to call made from / to a non-SIP user who does not have Session Manager Profile.

Which sequence describes the steps that should be taken?

A. Add an Avaya-SIP Communication Address to the user\\'s User Profile. Add a Session Manager Profile to the user\\'s User Profile. Select appropriate Originating and Terminating Sequences for the user from the options in the new Session Manager Profile.

B. Create a new Implicit User rule. Define a number pattern that can be compared with dialed numbers. Select appropriate Originating and Terminating Sequences to be applied when a match occurs.

C. Navigate to the list of Application Sequences and select the sequence to apply to the non-SIP user. Add the user\\'s extension number to the list of associated users. Select appropriate check box options to determine if the sequence should be applied In originating mode, terminating mode or both.

D. Create a new Non-SIP User Application Sequence Policy. Define the address and location of the non-SIP user. Select appropriate Originating and Terminating Sequences for the non-sip user from the given options.

Correct Answer: B

QUESTION 2

If two standalone session Managers and one standalone System Manager are going to be installed, how many IP Addresses will you need?

A. 3

B. 5

C. 6

D. 7

E. 9

Correct Answer: D

QUESTION 3

Application definition allows system administrators to define and manage individual applications, each with their own attributes?

The definitions allow administrators to add one or such applications to which of the following?

A. application programs

B. application data sets

C. application sequences

D. application lists

Correct Answer: C

QUESTION 4

What is the outcome of running SMnetsetup on a server that has an existing installation of session manager 601?

A. The network and date/time is configured on the server.

B. A System Manager System administrator login will be created.

C. The same version of the Session Manager software currently Installed is re-installed?

D. The current version of the Session Manager software is upgraded.

Correct Answer: A

QUESTION 5

From where can a System Manager (SMGR) export of user data be performed?

A. from an SSH session with the System Platform Dom-0

B. from an SSH session with the System Manager virtual machine

C. from an SSH session with the System Platform C-Dom (utilities domain)

D. from a web client access System Manager web interface User Management

Correct Answer: D

QUESTION 6

A Configuration Manager instance has been set up by an inexperienced administrator. A SIP entity in the network is failing on a regular basis and Session Manager sometimes does not detect the failure for up to 30minutes.

Which two Session Manager Configuration fields could have been set incorrectly? (Choose two)

A. Proactive cycle time.

B. Reactive cycle time.

C. Timer period

D. Override port and transport with DNS SRV

Correct Answer: AD

QUESTION 7

Which two statements describe the purpose of a System Manager (SMGR) role? (Choose two.)

A. It provides access to any number of resources managed by SMGR.

B. It impacts the originating and terminating applications that can be sequenced for a user.

C. It is automatically held by users that have been added to any group containing that role.

D. It can be held by multiple administrators at the same time and a single administrator can have multiple roles enabling tight control of access.

Correct Answer: AD

QUESTION 8

Review the output of the command shown in the exhibit. Which command is used to generate these results and what does it tell you?

A. swversion displays the Session Manager release information.

B. statapp displays the current status of the Session Manager services.

C. smconfig displays the network information and status of the Session Manager.

D. traceSM displays a ladder trace of the SIP requests going in and out of the Session Manage.

E. initDRS displays the Session Manager node registration and data replication.

Correct Answer: B

QUESTION 9

Which two wildcard characters does Session Manager allow to specify a location pattern? (Choose two).

A. "%" (percentage)

B. "$" (dollar)

C. "*" (star/asterisk)

D. "#" (pound/hex)

E. "X"

Correct Answer: CE

QUESTION 10

Which statement is true with regard to SIP Monitoring being enabled on a SIP Entity?

A. Session Manager will monitor the status of that SIP Entity by sending SIP OPTIONS requests.

B. SIP Entity will monitor the status of Session Manager by sending SIP OPTIONS requests.

C. Session Manager will monitor the status of that SIP Entity by sending SIP SUBSCRIBE requests.

D. Session Manager will monitor the status of that SIP Entity by sending SIP NOTIFY requests.

E. System Manager will monitor the status of that SIP Entity by sending SIP OPTIONS requests.

Correct Answer: A

QUESTION 11

What are two reasons for creating a network location? (Choose two.)

A. Locations are used to implement Call Admission Control.

B. The location of a caller is used to determine which Session Manager will process the request.

C. Locations are used to limit the number of users that may register to the session manager specific physical location.

D. Session Manager uses the termination location of a caller to determine which dial patterns to look at when routing the call.

E. Session Manager uses the origination location of a caller to determine which dial patterns to look at when routing the call.

Correct Answer: AE

QUESTION 12

Application definitions allow system administrators to define and mange individual applications each with their own attributes.

The definitions allow administrators to add one or more such applications to which of the following?

A. application programs

B. application data sets

C. application sequences

D. application lists

Correct Answer: C

QUESTION 13

A technician is tasked with creating a set of Routing Policies for the organization.

Which statement describes the steps that must be taken prior to defining a new Routing Policy?

A. A SIP entity must be specified as both a destination and as an origination point. You must provide the times of day that the policy applies, and a dial pattern or regular expression that the call URI must match.

B. The destination SIP entity can either be chosen specifically, or it may be selected implicitly using a matching expression. Multiple times of day the policy is active can be chosen. The policy must have either a dial pattern or regular expression.

C. A dial pattern must be specified which the called party in the SIP message is matched against. Inclusion of a time range, or regular expression, is optional but recommended since it makes the policy more specific.

D. A SIP Entity must be specified as a destination.

Correct Answer: C

QUESTION 14

While performing routine maintenance a technician has had to re-install System Platform. Which statement describes

what must be done next?

A. The SMGR Template must be installed.

B. The SMGR Template must be installed, followed by the utilities domain (in that order),

C. The utilities domain must be installed, followed by the SMGR Template (In that order),

D. The Dom-0 must be installed, followed that order) by the utilities domain and then the SMGR Template (in that order).

Correct Answer: A

QUESTION 15

What is validated when the Transport Layer Security (TLS) handshake and mutual TLS authentication is performed between the SIP entity and Session Manager?

A. entity link

B. entity name

C. domain

D. certificate

Correct Answer: D
